RY DECLARES DEATH DUE TO STRANGULATION

the conclusion of the inquest ast Monday at the W. C. Lass- ndertaking parlors in Daly City the remains of Mrs. Evelyn r, also known as Mona Moore, battered and lifeless body was wrapped in a sheet in O'Malley near Salada Beach, two weeks he jury decided that death was o strangulation at the hands of s unknown.

stable S A. Landini told of the g of the body in the gulch, and e particulars pertinent to the

H. A. Rankin, who examined the after it was found, gave it as pinion that death was due to gulation when a thin cord was ed about the neck of the un- nate woman. The body was bruised as the result of a beat-

o negroes, Dixon and MacBean, are being held by the police and whom Mrs. Gerber was last seen were placed on the stand and ioned by Dr. W. A. Brooks, y coroner, and Detective Otto rickson, of San Francisco.

s. Mary Brown, foster mother of murdered woman, testified that Gerber was a drinker, and that had befriended her, hoping that might influence the girl for the r. Mrs. Brown said that two s before Mrs. Gerber was murd- the latter had telephoned her r mother and asked her to care he disposal of her remains if any- should happen to her. Mrs. er was 35 years old and was born ays, Harbor, Washington, accord- o Mrs. Brown.

at Evelyn Gerber went to Jack- club, a negro night resort, about lock or later on the morning of 1, and there met two waiters, n and MacBean, was revealed in grilling of the two men. Mrs. er then went with the two men eir rooming house. There they k and smoked until about 6 a. m., she left the party. The two oes testified that they watched go down the steps and pause to h a cigarette she was smoking re going out into the street. They ed that was the last they saw of

According to the testimony of ors, Mrs. Gerber was murdered tly after.

fore going to Jackson's club, e she met Dixon and MacBean, Gerber was at Mrs. Helen Wil- ' place on Buchanan street, re she is said to have engaged in ir-pulling match with Miss Marie ard, who also lives at Mrs. Wil- s' house. Mrs. Gerber had been king, according to the two women, the battle occurred when Miss ard laughed at Mrs. Gerber's of a $2,500 fur coat that she ned she owned. After the fight, . Williams ordered Mrs. Gerber of the house. The next trace of was at Jackson's club.

ealthy relatives of Mrs. Gerber Saturday notifed authorities that would not contribute toward her al, and did not desire to have y shipped to Grays Harbor, Wash., former home.

rs. Luella D. Pepper, manager of W. C. Lasswell & Co., mortuary blishment, and deputy coroner, re- ed a telegram from a married r of the murdered woman in which said the girl's family was not erned with Mrs Gerber's funeral wished to have nothing further to with the case.

bandoned by her relatives, the re- ns of the murdered woman were to rest as a result of the action her foster mother, Mrs. Amy wn, who, out of her slender means, vided a copper casket and a plot Mt. Olivet cemetery, and herself cted the funeral services which k place at the mortuary chapel of C. Lasswell & Co.

ANDITS PLUNDER STOCKTON'S STORE

The store of A. L. Stockton, 6130 ssion street, was broken into about 0 a. m., last Sunday. The safe s smashed with axes and tools n from display cases, a number tools being damaged in trying to ak the safe. About $200 worth of ls and hardware was taken. The h register was broken into, and a ewriter was taken, also the check tector.

About $100 worth of tools were ated later in a pawn shop on How- l street. It is believed there were o men engaged in the robbery.

Marshal Doyle has some very good ies and hopes to catch the burglars fore long.

FAVORS PAVING ON THE WEST SIDE

At the meeting of the Daly City board of trustees held Monday evening in the City Hall, a pettition was presented protesting against allowing an asphalt plant to be erected on the property within the Daly City limits, on the west side of the railroad tracks opposite Mission and Hillcrest Tracts. There were 121 signatures to the petition which was filed for future consideration.

Trustee Moran reported that provisions had been made to secure accident insurance for the local firemen.

Trustee Sunderman made a report on the library, announcing that new lights were needed in the library.

Trustee O'Rourk made a report on streets which was decidedly in favor of paving the connecting streets between Mission Tract, Hillcrest Tract and Vista Grande Tracts.

FORMER RESIDENT WINS HIGH HONORS

Mrs. Mary White, 50 Theta avenue, has received a photograph of a work of art sculptured in wax by Miss Blanche Rollins, a former resident of Hillcrest Drive, Daly City, her mother being Mrs. McClelland, now residing in this city.

The title of the subject is "Somebody's Mother," in memory of Mothers' Day. The photograph shows the artist standing by the figure in wax, which is life-like in appearance, being that of a woman past middle age.

This work of art has been placed on exhibition in Boston, where Miss Rollins is now engaged in her profession as an artist, and is receiving the plaudits and commendation of all who have had the privilege of seeing this artistic bit of work.

Blanche Rollins has many friends in Daly City and vicinity who will be pleased to learn of the success she is achieving in the East in her chosen field of work, and all are proud of her success.

TO DISCUSS PLANS FOR CELEBRATION

If you are interested in putting over the project of having a general county celebration of Independence Day in Daly City of July 4, 1927, you should not fail to be present at a meeting to be held in the City Hall next Wednesday evening, July 21.

All delegates chosen by the different societies, lodges, churches and other bodies, and all persons in any way interested in this movement are urged to be present.

It is expected that at this meeting plans will be perfected for this celebration, providing sufficient interest is shown in the movement by the people of this city.

If you are desirous of having Daly City act as host to all the other communities in the county at a celebration of the Fourth of July next year, now is the time to act. Be at the City Hall next Wednesday evening, invite your neighbor to go with you, and either lend your support to this movement, or show the gathering some good reason for not going on with the movement for the celebration.

It is hoped the City Hall will be filled with Daly City people next Wednesday evening, all boosting for the proposed celebration.

BUILDING PERMITS ON THE INCREASE

There seems to be no cessation in building activities in Daly City and vicinity. That Daly City is holding her own is indicated by the issuance of the following building permits reported by City Clerk B. C. Ross:

John M. Fagundes, 3298 San Jose avenue, alterations.

John R. Lindsay, 845 Brunswick, five-room house; 867 Brunswick, five-room house; 873 Brunswick, five-room house; 877 Brunswick, five-room house; and 881 Brunswick, four-room house; 123 Acton, four rooms and garage.

New Era Workshop, 6036 Mission, alterations.

H. Shapiro, 209 Hillcrest Drive, four rooms and garage; 213 Hillcrest Drive, four rooms and garage.

B. Melano, 374 Templeton, five rooms and garage.

Lomita Park Orders Fire Engine

As a result of the favorable vote at the recent election, a combination hose and chemical engine has been ordered and is now under construction by the American-La France company for Lomita Park. This engine has been procured for $2,150.

TIMELY TOPICS OF LOCAL INTEREST

The passing of years bring about great changes in public feeling. An election is approaching and the interest is so lacking that candidates for high offices such as that of the governor can not get an audience except by appearing before popular clubs, at their dinners on other social functions, which are courteous to all but have preference for no one.

So far, not a candidate seems to have any great personal following, and party affiliation means nothing except on election day.

In the days gone by, before the official primary, the interest in public welfare was decidedly keener. Politics was then a subject of general conversation and as a consequence the rank and file were better informed.

The outstanding members of both the majority and the minority parties were proud to be named as delegates to the respective county and state conventions, and if funds were needed they dug down into their pockets in order to make a respectable showing, no matter how hopeless the prospects might appear. This caused general advertising and, perhaps, induced the placing of the better foot forward. And how wonderful were the mass meetings! The bon-fires blazing, the anvils booming, the brass band playing, the flaming posters, and possibly a parade, altogether making a celebration worthy of attention.

If the speakers were good, and there were many of that description, the audience received an excellent lesson in civil government and current history. That was real Americanization, and there was no need of maintaining schools to teach it as is done now.

Nowadays, the individual has ceased to take an interest. He is busy about his own affairs and trusts that all will go well and that if he registers and votes he has done his duty. In fact, it has become a necessity to arouse him in order to get him to register, and even when the primary election takes place, sometimes millions must be spent as recently in Pennsylvania, in order to get him out to vote.

The spending of such enormous sums at the primary indicates that, in Pennsylvania, rich men do not hesitate to buy their way into the United States Senate, under the present law, precisely the same as they were accused of doing in the county convention days.

Historians are a unit in proclaiming that a country is safest when the individuals take the greatest interest in their country's welfare. Must we face the admission that we are becoming indifferent? If so, measures should be resorted to at once to re-establish the waning interest in public affairs.

In our county conditions are good. The public officers are capable, honest and courteous. Without exception they are deserving of being retained as public servants. It is a matter of general congratulation that very few of them have opposition to meet.

At present, the small office-holder is not envied, because the opportunities in the world, outside of office, are so much better. However, take interest in public affairs for the good of your country.

* * *

Quite a few teachers throughout this state have been disturbed recenlty by an interpretation of the law by the State Board of Education that every teacher acting as the principal of a school building containing six or more teachers must be the holder of an administrator's credential, issued by the state board.

At the time of the introduction of the law it was considered that it was necessary for only the head of the district to hold such a credential, and it was not difficult for him to obtain such, and there was no worry, but the later interpretation caused considerable anxiety.

On last Tuesday the state board smoothed over the difficulty to a certain extent, by passing a resolution providing for an examination for those whose positions were in question, to take place on August 14, 1926, after a six weeks' course in summer school during vacation.

The State Board of Education is deserving of commendation for its generous consideration.

But whoever is responsible for the law requiring such a credential from the heads of schools has much to answer for. Through the law, great and unneccessary hardship has been placed upon the most dependable teachers, who have been selected to fill their present positions on account of their superior ability. To begin with, they have been burdened with fear as to their right to hold the places their faithful work had won, and even now they must devote two or three whole summer vacations to hard lecture and reading courses in order to obtain the necessary credits. If such is not hardship, will some one please tell us what is?

Were there possibilities of good results from the enforced hardship, then it might be courteous to be silent, but it appears that the enforcement of the law will prove a check to school efficiency. Hereafter, the gifted one can not be promoted and put at the head where he or she belongs. Such a person, with all the natural charm in the world, must plod on, in obscurity, unless he or she, through giving up the position for a term or two, or the vacations for years, obtains an administrator's credential.

It was Thomas Jefferson who said, "The more laws the more danger."

* * *

The fiscal year just ended must be written down as one of the most wonderful advancement for this city. No matter where you look, you see numerous evidences of this in the large number of excellent homes, almost every one better than people ever dared to build before.

Nearly all the new buildings have been purchased and occupied almost as soon as completed, and the monthly payments have been made promptly.

All this improvement indicates that we are located in a popular part of the state, and that prosperity is favoring the people; otherwise they could not buy and wiuld not come here.

Another example of enterprise and prosperity is the new parochial residence of St. Maximus parish, which is about completed at a cost of $12,000, and, strange as it may seem, it may be stated in all truth that it will be paid for, in full, before the end of the year, out of the generous contributions of the people of the parish. The most optimistic did not think it could be done, but it is accomplished.

RECKLESS DRIVER INJURES THREE

An accident which might have resulted more seriously than it did occurred last Sunday evening when an Essex coach, coming down Mission street, endeavored to avoid a collision and turned down Vista Grande avenue. The coach was traveling too fast and crashed on to the south corner, breaking down the tree at the sidewalk and running over Miss Cynthia Morgan, the wheels passing over her legs and injuring her quite severely. Dorothy Hayden, who was with Miss Morgan, was struck and suffered a compound fracture of the skull. James Lowell was also a victim of the accident, receiving severe bruises on the shoulder.

Witnesses claim that the accident was the fault of the driver of the Essex coach, Harold A. White, 4053 Twenty-third street, San Francisco.

Mr. White took Miss Morgan to Dr. Rankin's office, and Raymond Crevello, who was passing by, took Miss Hayden and Mr. Lowell to the doctor's office. It is said White left town without notifying the police. Marshal Doyle was on the scene almost immediately, however, and got all needful information. He located the number of the Essex and secured a warrant for White's arrest on the charge of reckless driving.

White's bail was fixed at $500. His case is to come up today. Marshal Doyle states that he has two other charges to place against him when he comes up for trial.

NEGROES FREED ON MURDER CHARGE

Three men held for the murder of Mrs. Evelyn Gerber, whose body was found near Salada Beach on July 1, was released Tuesday afternoon in San Francisco, when detectives were unable to link them directly with the murder.

The three men are Bruce Dixon, Albert MacBean and Warren George, colored. Dixon and MacBean were brought to the inquest in Daly City on Monday, when the coroner's jury rendered a verdict that the woman had come to her death at the hands of persons unknown.

Police are still searching for a sheet which will match the one in which the woman's body was found, it is said. No such sheet coulld be found in the rooming house occupied by Dixon and MacBean, who were the last persons to see Mrs. Gerber alive, so far as the police could learn. This was on Thursday morning, two days previous to the finding of her body.

McGovern Wins Endorsement

Endorsement of Sheriff T. C. McGovern for re-election has been made by two San Mateo county civic bodies. The South San Francisco Italian-American Club gave their endorsement at a recent meeting, the Salada Improvement Association having previously pledged its support.

PERMIT GIVEN FOR DRAINAGE SYSTEM

The county engineer's office is now working on plans and specifications for the new drainage district in South San Francisco, covering the land from the cemeteries to the bay through which the Colma creek overflows each year. The petition for the establishment of the district was filed by Attorney A. J. Scampini during the first part of June, and was granted by the county board of supervisors at its session last week.

The next step in the actual establishment of the drainage system is the drawing up of plans and specifications, definitions of boundaries and hearing protests on these matters.

Later costs of construction will be apportioned and assessments made, with protest hearings. Bids will then be asked for and and the construction awarded. After the construction, bonds must be issued to cover unpaid assessments.

The fact that representatives of both the Southern Pacific and Market Street Railways were present at the time when the permit for the establishment of the district was granted, and that no objections were raised, is taken as an excellent indication of the completion of the project with the least possible delay. Both companies are large land holders in the district affected, and it is said that both are desirous of some remedy for the present situation which requires expensive repairs to roadbeds each year, and often makes the tracks unsafe for travel after heavy rains.

BURGLAR LEAVES SHOES UNDER BED

On Tuesday, between 8 and 10 p. m., the home of Mrs. Tiebays, 910 Hanover street, was broken into. A small amount of jewelry and clothing was taken. Marshal Doyle was notified immediately. He found footpoints, and upon measuring them discovered that they were the same as those in J. Jensen's home, which was robbed recently. A pair of shoes were found under a bed, and Doyle believes that the bandit heard some one coming and was scared off before he could replace his shoes.

STATE REVENUES SHOW INCREASE

Cash receipts of the state government for the fiscal year 1925-26, which ended June 30, reached a total of nearly $115,000,000, or approximately $5,000,000 more than payments made on warrants during the twelve months, State Treasurer Charles G Johnson has announced.

Johnson's report, detailing financial transactions of the treasury for the year, said:

State revenues showed a healthy increase for the fiscal period just ended, the cash receipts totaling $114,485,546.03. Actual payments made from the treasury during the same period aggregated $109,449,975,-32, or $5,035,570.71 less than the receipts. Transfers from one fund to another, or so-called "paper transactions," aggregated $42,602,493.95.

It should be noted, however, that the actual payments made on warrants do not represent the true cost of goverment for the twelve months, due to the fact that there is considerable duplication in the handling of these funds.

"The actual cash balance at the termination of the fiscal year was $42,684,845.98. This indicates an increase in the cash balance of approximately $5,000,000 as there was a balance at the beginning of the period of $37,649,275.27.

"Although the daily receipts of the treasury during the year averaged $430,378.16. the office was administered, without increased expense to the taxpayers. The total cost of maintaining the treasury for the period was $31,660."

SUMMER DANCE PLANNED

A summer dance will be given under the combined auspices of Alberian Institute No. 93, Young Ladies' Institute, and Phil Sheridan Council No. 72, Young Men's Institute, on Friday evening, July 23, in the ball room of the Y. M. I., 50 Oak street, San Francisco.

Committees from both organizations have perfected arrangements and it is freely predicted that this will be one of the most pleaant social functions of the summer season.

Music for the occasion will be furnished by Pete Butti's syncopators, who have arranged many novel and interesting numbers. Many branches of the Catholic Daughters and Knights of Columbus are expected to attend in large numbers.

CLASH MARKS BAY BRIDGE MEETING

Charges and countercharges were hurled in a clash Monday between the Board of Supervisors and the Downtown Association over the latter's action in securing a delay in the War Department's decision on a bridge across San Francisco Bay.

The climax of the controversy was reached when Charles Brennan, local attorney and representative of a project to bridge the bay at Hunter's Point, arose and charged that the Alameda-San Francisco Bay Bridge Commission, sponsored by the Downtown Association, was composed of proponents of a plan to build a tube under the harbor.

This charge was made immediately after Sylvester J. McAtee, representing the Downtown Association, had assured the board that the commission was composed of members who had no interest in any particular project.

"It is my duty to inform you," Brennan said, "as to the method of appointment of the Alameda-San Francisco Bay Bridge Commission.

"The commission was appointed by Ted Huggins, representing the so-called Victory Tube project. Huggins was present in this room in December 1925, at the hearing before Mayor Schulz and admitted he favored the Victory Tube project.

"Captain Frank Ainsworth, another member of the commission, has been and still is a representative of this tube project in Washington, D. C.

"Sidney W. Taylor Jr., another member was introduced at the 1925 hearing as the industrial engineer of the tube project."

A resolution was introduced by Supervisor Stanton to notify the War Department that the telegram from the bridge commission which won the delay was without the sanction of the board of supervisors, and that the board had not joined in the request, as the commission had represented in the telegram. The resolution was adopted

YOU HAVE FIFTEEN DAYS IN WHICH TO REGISTER

The work of registering the voters of this section is not proceeding as satisfactorily as should reasonably be expected. This is not the fault of the deputy registrars appointed by County Clerk Elizabeth M. Kneese, who may be found at their offices, ready to properly register you for voting this year, if you will only take the trouble to call on them.

For the convenience of voters in this section, County Clerk Elizabeth M. Kneese has appointed the following deputies in Daly City:

Ellis C. Johnson, City Hall.

Mrs. Ella McKee, 39 Irvington street.

Mrs. May E. Hawkins, 139 Knowles avenue.

John J. Fahey, 6284 Mission street.

Mrs. Ida Preston, 209 Woodrow street.

B. C. Ross, City Hall.

Mrs. Catherine Reinhart, 1056 Brunswick street.

You have just fifteen days more in which to register!

CELEBRATION OF FORTIETH WEDDING ANNIVERSARY

A very interesting wedding anniversary celebration took place last Sunday morning in St. Catherine's church, Burlingame, when Mr. and Mrs. Thomas Hardeman celebrated their fortieth wedding anniversary. Their ten grown sons and daughters and all their grandchildren attended the 11 o'clock mass. Their oldest son, the Rev. Charles Hardeman, of Oakland, celebrated the mass and gave Holy Communion, his father and mother being the first to receive the sacrament. After mass all adjourned to the Women's club house in Burlingame, where a delicious luncheon was served to the members of the family and fifty friends, including the bridesmaid and best man who stood up with them forty years ago, also the guests who were present at that time. After luncheon an interesting entertainment was staged, many toasts being given, and there was also an excellent orchestra. Mr. and Mrs. Hardeman have resided in Burlingame for a number of years.

The following sons and daughters were present at the celebration: The Rev. Charles Hardeman, Dr. Vincent Hardeman, the Messrs. Paul S., Luke S., Thomas, Fabian, William and Francis Hardeman, Mesdames Jean Hardeman Willemann and Regina Hardeman McGee.

Luke Hardeman, one of the eight grandchildren present, attends the Crocker school and has made his home with Mrs. H. O'Connor over four years. He has a fine voice and surprised the guests when he sang many popular songs, accompanied on the piano by his sister Francis.

Hardware Sale

Daly City and Crocker People Take Notice

—I am about to turn over my Harware business to Mr. C. A. Turner. Before I do this, I would like to show the people of Daly City and Crocker that I appreciate their past patronage, so Mr. Turner has given me permission to make a SALE FOR TWO WEEKS ONLY.

Here is Your Chance

TEN PER CENT OFF on every dollar purchase in Hardware, Paints, Oil, Silverware and Household Goods.

Here Are Some Items

8-Quart Bucket ..... 20c **Union Made Brooms 45c**
100 ft. Clothesline $1.00 **Clothes Pins....3c dozen**
All these 10 per cent off

Clousky's Hardware

5752 MISSION STREET, AT OLIVER

In a recent murder trial much stress was laid upon the testimony of a "mystery woman," as though there were any other kind.

CERTIFICATE OF INDIVIDUALS TRANSACTING BUSINESS UNDER A FICTITIOUS NAME.

THIS IS TO CERTIFY that we, the undersigned Joseph D. Altieri, Joseph Belli, Urbano Granucci and M. J. Soldavini, are co-partners transacting business in the State of California, under the firm name and style of M. Belli & Company, Belli Motor Company, Colma Motor Car Company and Pioneer Truck Tire Company; that the principal place of business of each of said co-partnersips is situated in the Town of Colma, County of San Mateo, State of California, and that the names of each of the members of said co-partnership, and their respective places of residence are as follows, to-wit:

Joseph D. Altieri, Colma, County of San Mateo, California;
Joseph Belli, Colma, County of San Mateo, California;
Urbano Granucci, Colma, County of San Mateo, California;
M. J. Soldavini, Colma, County of San Mateo, California.

JOSEPH D. ALTIERI.
JOSEPH BELLI.
URBANO GRANUCCI.
M. J. SOLDAVINI.

STATE OF CALIFORNIA, County of San Mateo. } ss.

On this 28th day of June, A. D. 1926, before me, Angelo J. Scampini, a Notary Public in and for the County of San Mateo, State of California, personally appeared Joseph D. Altieri, Joseph Belli, Urbano Granucci and M. J. Soldavini, known to me to be the persons described and whose names are subscribed to the foregoing instrument, and they duly acknowledged to me that they executed the same.

IN WITNESS WHEREOF I have hereunto set my hand and affixed my official seal at my office in the County of San Mateo, State of California, the day and year in this certificate first above written.

(Seal.) ANGELO SCAMPINI.
Notary Public in and for the County of San Mateo, State of California.

ANNUAL DISPLAY AT DAHLIA SHOW

Dahlias of all sizes, from the tiny pom pom to the "decorative" type that measures nearly a foot across will be on show at the eleventh annual Dahlia Show to be given at the Palace Hotel, San Francisco, August 26 to 28, inclusive.

The dahlia reaches its best growth and most elaborate color schemes around San Francisco Bay, according to floricultural experts, and the officials of the Dahlia Society of California, who sponsor the annual display in San Francisco, expect a particularly representative showings in all the eighty-seven classes to be given prizes, and especially in the novice class, for which unusually attractive prizes are being offered.

Twenty-three prizes are offered for amateurs only, and there are many other classes in which amateurs may compete. An increasing number of private gardens present their flowers each year, and according to H. T. Henning, secretary of the organization, the number of entries already in shows a larger interest than ever before at this time in advance of the date of the show.

A prosperous tailor friend attributes his success to Eve, explaining that if she hadn't eaten that apple people never would have worn clothes

Many wonder how their neighbors got their money, but more are curious about how they will spend it.

The people of California regulate public utilities through a State Commission.

Rates, service and finances come under the jurisdiction of this Commission. Its orders and decisions are based on the studies of experts—engineers, statisticians and economists.

Regulation coupled with the inventions, economies and foresight of the Power Companies insure fair rates and good service.

Rates in California are low.

Service is a model for the rest of the United States.

Since 1913 the average per capita cost of living increased 65%, while the average cost of electricity decreased 8%.

FAVORABLE DECISION HOPED IN COYOTE BRIDGE PROJECT

John J. McGrath, who has been conducting a whirlwind campaign to secure moral support for the proposed San Mateo-Hayward bay bridge, is greatly encouraged as to the prospect of the completion of the big span.

McGrath concluded his campaign at Half Moon Bay, and found many in favor of the project. He also met with encouragement in Sacramento, and it is announced the board of trustees of Modesto, Manteca, Stockton and Sacramento have passed resolutions favoring the Coyote Point bridge.

The final decision of the war department on whether or not the local bridge will be permitted will be rendered today, it is expected, and a favorable decision is confidently expected by the backers of the enterprise.

The franchise for the construction of the Coyote Point bridge has been granted by the San Mateo board of supervisors to Frank C Towns, of New York, and a group of eastern bankers. The bridge will cost, it is estimated, $10,000,000, which sum has already been fully subscribed. In fact, the contract for the construction of the bridge has already been let to the Raymond Construction Company, and that firm has posted a large cash bond with the government, at the request of the war department. Test borings have been completed in the bay, and a solid foundation of bedrock has been found under the covering of tide water mud.

The bridge will allow four lines of motor cars in two lines each direction, and there will also be two pedesrian walks.

TWO DAYS ADDED TO WEEK

One of the greatest benefits of modern times is the up-to-date laundry. The hours formerly spent in hard, unpleasant work are now given to womankind, free from all of the drudgery of washday, and the exhausting labor of ironing piles of clothes every week has been banished from the life of every modern housewife. The laundry has in this way added two days to the week of the present day woman. The scientific cleansing processes of the modern laundry assure the highest quality of perfection in cleanliness, purity and finish.

The Chong Lee Laundry, 653 Pacific Stret, whose phone is China 232, is one of the finest examples of what a laundry should be. Their equipment is the latest known to the laundry industry, and this enables them to turn out the very best class of laundry work.

This means that the clothes are brought back in all their original richness, means sweet-smelling, clean white linen, and that the most delicate garments may be sent to them in perfect safety. They offer a complete service for all your washing, and every piece is returned spotlessly clean and beautifully finished, at a nominal cost. Shirt and collar service is a specialty with them. Men who appreciate collar comfort and style send their collars to them, as a correctly laundered starched collar gives a neat and well dressed appearance to any man. Their special facilities for cleaning fine blankets, comforts and curtains insure the finest kind of finished work.

This modern and progressive laundry solicits a trial of your work, and we believe you can do no better than entrust your work to them. —Adv.

REPUBLICANS CLAIM TO HAVE SIX TO ONE EDGE

Republicans outnumber members of other political parties six to one, according to figures released last week from the office of County Clerk Elizabeth M. Kneese. According to this report, party affiliations of citizens who registered in Burlingame show there are 2,553 Republicans, 453 Democrats, 11 Socialists, 5 Prohibitionists, and 281 who declined to give their affilations. San Mateo registered 2,644 Republicans, 453 Democrats, 36 Socialists, 1 Prohibitionist and 281 who declined to give their affiliations.

For the 1924 primaries San Mateo registered 3,503 voters, while Burlingame registered 3,517. The general election in 1924 found 3,895 registered in Burlingame and 3,795 registered in San Mateo.

DEATH CLAIMS PROMINENT SAN MATEO BUSINESS MAN

Nicholas J. McNamara, director of the Anglo California Trust Company and well known pioneer of San Mateo, died Tuesday night at Mills Memorial hospital, following an illness of ten days. An operation was performed last Saturday in the hope of saving his life, but he failed to rally. The deceased, who was 60 years of age, had made his home in San Mateo for more than twenty years, and was the owner of valuable property holdings in that city. He retired about twenty years ago from active business, having formerly conducted a chain of drug stores in San Francisco.

In Thibet practically every family has at least one son in the priesthood.

More than a million canary birds were shipped to various parts of the world from Norwich, Eng., last year.

FROM ALL CORNERS

A press dispatch from South Africa tells of the discovery of a curious tribe in the Belgian Congo, described as an intermediate type between man and ape, strongly suggestive of the "missing link."

Optical glass, which before the World war was only procurable in Germany, is now being manufactured by the United States Bureau of Standards in large quantities.

It is estimated that three-fifths of the timber originally standing in the United States has been destroyed by fire.

Three large American film companies will quit operating in Hungary on account of too much government interference.

Rev. Bob Jones, the noted evangelist, has insured his life for $525,000, in favor of the college founded by him at College Point, Florida.

Greece will levy a tax of $10 on all foreigners visiting that country, but will provide free tickets for admission to historic buildings.

Turkey is adopting the use of trademarks, which must be placed on all goods manufactured in that country.

Poultrymen of New Jersey produce $15,000,000 worth of eggs a year.

On January 1 it is estimated that there were more than 25,000,000 motor vehicles in use in the world.

One American farm home in forty is now equipped wtih radio receiving set.

Owing to growing difficulties of traffic congsetion all circuses are said to have agreed to eliminate street parades in future.

Mrs. Mary Morgan of Brooklyn was awarded $13,500 damages against the city on account of slipping on an icy sidewalk and receiving an injury which shortened her leg two inches.

The average American uses the telephone nine times as often as the average Englishman or Frenchman.

Howard University for negroes, founded in Washington in 1876 by General O. O. Howard, now has as its first negro president Bishop John A. Gregg of the African Methodist Episcopal church.

Litang, in the Himalayas of Thibet, in the highest city in the world.

The twenty-first verse of the second chapter of Ezra contains all the letters of the alphabet excepting "j."

Typewritten legal documents are a recent innovation in France, where they have heretofore been written entirely by hand.

In Benares, the holy city of the Hindus, are more than 1,500 temples and mosques.

Rev. Arthur Lyon, Congregational pastor of West Palm Beach, Florida, was removed from the presidency of the local ministers' association becaused he favored the evolution theory in a recent sermon.

About two hundred different kinds of currency are in use in China, but many of these are good only in the provinces where used.

James Harrigan, of New York, paid a $2 fine for speeding, received $5 too much change and returned the extra money to the magistrate, who remitted the fine as a reward for Harrigan's honesty.

Miss Sarah Weyne, of Dudley, England, was awarded $100 damages against a barber who snipped off a slice of her ear while shingling her hair.

Cracksmen who blew open a safe in a Chicago suburb got only three copper cents for their trouble.

A lingerie shop in Glasgow was wrecked by a bull which ran amuck in the street and dashed into the place.

Mlls. Corinne Lesperets, of Marseilles, France, was convicted of being the head of a gang which had systematically blackmailed several merchants.

Shortly after his wedding, George R. Porter, of St. Paul, was arrested for stealing the suit in which he was married.

Lieutenant J. C. Robeson, a British officer in India, attacked while unarmed by a panther, choked the animal to death, after receiving several wounds.

French fishermen took alive a young whale weighing half a ton off the Iceland coast.

A New York radio man advertises to trade a radio set for four automobile tires.

Sidney Wagner, 10-year-old London boy, brought suit for assault against a teacher who whipped him in school, but lost his case.

George Hennard, of Hammond, Indiana, was given a jail sentence for neglecting to feed his dog for several days.

Policeman C. A. Ryan, of Chicago, was fined when a neighbor reported him for failing to secure a license for his dog.

James R. Franklin, of Chicago, found a month-old girl baby which had been placed in his automobile and abandoned.

Eugene Beaville, who claimed to be an American, is wanted for swindling printers in fifty-five English towns.

Rev. Michael Murphy, of Dublin, was arrested for begging on the streets of London, but was released with a warning not to repeat the offense.

Warrants are out for more than five hundred Glasgow men who have deserted their wives during the past two years.

Nearly all the hair was burned off the head of Miss Christine Logan, of Duluth, when it caught fire from a gas jet.

When Albert Corwin tried to jump into Lake Michigan with suicidal intent, a man grabbed him by the leg and held him until a policeman arrived.

Mei Lan Fong, considered the greatest Chinese actor, has won his fame principally through his portrayal of female characters.

Discovery of a new gold deposit has been reported near the Artic Circle in Sweden.

A MODERN NECESSITY

One of the greatest benefits of modern times is the up-to-date laundry. The hours formerly spent in hard, unpleasant work are now given to womankind, free from all the drudgery of wash day, and the exhausting labor of ironing piles of clothes every week has been banished from the life of every modern housewife. The laundry has in this way added two days to the week of the present day woman.

The scientific cleansing processes of the modern laundry assure the highest quality of perfection in cleanliness, purity and finish. The Capital Laundry, located at 1562 Geary street, whose phone number is West 8394, is one of the finest examples of what a laundry should be. Their equipment is the latest known in the laundry industry, and this enables them to turn out the very best of laundry work. This means that the clothes are brought back in all their original richness, means sweet-smelling, clean white linen, and that the most delicate garments may be sent to them in perfect safety.

They offer a complete service for all your washing, and every piece is returned spotlessly clean and beautifully finished at a nominal cost. Shirt and collar service is a specialty with them. Men who appreciate collar comfort and style send their collars to them, as a correctly laundered starched collar gives a neat and well dressed appearance to any man. Their special facilities for cleaning fine blankets, comforts and curtains insure the finest kind of finished work.

This modern and progressive laundry solicits trial of your work, and we believe you can do no better than entrust your work to them. —Adv.

NOTICE TO CREDITORS

No. 3856.

In the Superior Court of the State of California, in and for the County of San Mateo.

In the Matter of the Estate of Louis Lagomarsino, Deceased.

Notice is hereby given by the undersigned Alice Lagomarsino, executrix of the last will and testament of Louis Lagomarsino, deceased, to the creditors of and all persons having claims against the said deceased, to file them, with the necessary vouchers, in the office of the Clerk of the Superior Court of the State of California, in and for the County of San Mateo, or to exhibit the same, with the necessary vouchers, within four months after the first publication of this notice, to the said executrix at the law offices of J. E. McCurdy, Wisnom Building, San Mateo, California, the same being the place for the transaction of the business of said estate in the County of San Mateo, State of California.

Dated this 18th day of June, 1926.

ALICE LAGOMARSINO,
Executrix of the Estate of Louis Lagomarsino, Deceased.

J. E. McCurdy, Attorney for Said Executrix, San Mateo, California.

First publication in Daly City Record June 18, 1926.

RADIO

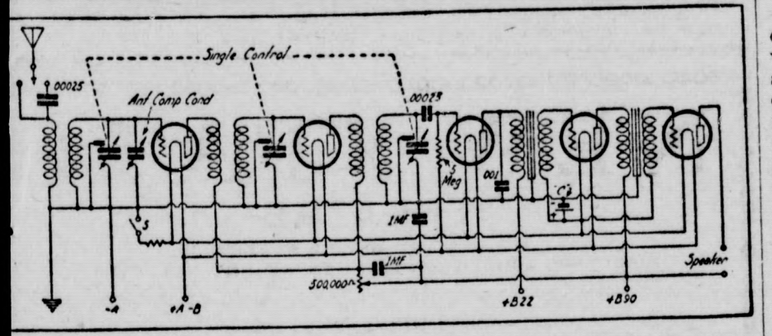

Diagram of Five-Tube, One-Control Radio-Frequency Set, Which Employs Two Stages of R. F. With Positive Control of Oscillations.

By JAMES E. CARTER

In the New York Herald-Tribune.

The radio-buying public has reached rtain definite conclusions about hat makes up a good radio receiver. hese conclusions, in practical form, e embodied in most really successful anufactured sets of today. Some re- ivers have greater perfection than hers. Some are of better design and nstruction. A few are outstanding achievement.

A good set, first of all, whether it e home-made or factory-built, must e of correct design. The home con- ructor who is contemplating the uilding of a receiving set is natural- desirous of obtaining the utmost the way of performance and is eenly alert to improvements in the uccessful manufactured set.

The first point of importance to the ome set builder will be the type of ircuit to use. It is needless to say hat the day of the regenerative ickler feed-back type of receiver ithout radio-frequency amplification efore the detector is over.

There remains the straight radio- requency circuit, with positive con- rolled oscillation, which is probably he easiest all-around highly efficient ircuit to construct.

Volume and Distance.

For the set builder who is situated ifty or more miles from a broadcast tation two stages of tuned radio-fre- uency amplification, followed by a detector and two or three stages of audio amplification, will give ample satisfaction in the way of volume and distance. Where the user is located within 50 miles of a strong broad- casting station three stages of tuned radio-frequency amplification is neces- sary to work distant stations as near as 20 kilocycles either above or below the near-by station.

In the accompanying diagram the five-tube radio receiver to be de- scribed in this article is shown. This set employs two stages of transformer coupled tuned radio-frequency ampli- fication, a non-regenerative detector and two stages of transformer coupled audio-frequency amplification. An examination of this diagram will show that there is nothing unusual in the wiring of the circuit, the chief point of interest being the way in which one- control tuning is accomplished. A triple condenser is used to tune the secondary coils of the three radio- frequency transformers, all of which are identical in construction, and a small adjustable fixed compensating capacity is connected in shunt with each of the three units of the con- denser to compensate for the varia- tion in the capacity of the wiring of each of the circuits. Also a variable antenna compensating condenser is connected in shunt with the unit of the condenser tuning the secondary of the antenna coupler. This has been found necessary to make possible effi- cient operation with any type of an- tenna. Another feature which makes the set more flexible is the small fixed condenser, which may be placed in series with the antenna. When this condenser is in use the receiver is more selective and may be operated from a large antenna without experi- encing interference.

The Parts Needed.

The following is a list of apparatus actually employed in the construction of this receiver:

One three-gang Perlez condenser (each section .00035 mfd.).
Three radio-frequency transformers matched for use with the condenser (Perlez or home-made).
Two Thorardson audio-frequency trans- formers.
One Hammarlund compensating con- denser (50 mmfd.).
One 500,000-ohm Centralab variable re- sistance.
One Centralab modulator (optional).
Five Benjamin sockets.
Two Dubilier .00025 mfd. fixed condens- ers.
One Dubilier .001 mfd. fixed condenser.
Two Dubilier 1 mfd. fixed condensers.
One 5 meg. Durham grid leak.
One 6-ohm rheostat.
One Carter battery switch.
Eleven Eby binding posts.
One panel 23½x9x3-16 inches.
One panel 10½x4¼x3-16 inches.
Two panels 3x2¼x3-16 inches.
One baseboard 23x10x½ inches.

The method employed to control the volume of this receiver eliminates the necessity of connecting jacks in the output of each stage of amplifica- tion. A 500,000-ohm variable resist- ance is connected in series with the plate supply of the two radio-fre- quency amplifier tubes, and by ad- justing this resistance the sensitivity of the receiver may be increased or decreased as desired. By using this method to control volume any desired amount of sound may be obtained without introducing distortion. Also this method is superior to detuning the set, as it does not reduce the de- gree of selectivity. In addition to this volume control, the set is equipped with a control device to con- trol the output of an audio ampli- fier. This instrument is not shown in the diagram, as it is not considered necessary when the sensitivity control is employed. For those who wish to use a modulator, however, it may be explained that it consists of a high resistance potentiometer connected across the secondary of the first audio- frequency transformer, with the slider connected to the grid of the tube.

The Triple Condenser.

As may be seen, the whole set is built around the triple condenser, which is of the straight-line frequency die cast type. This entire unit is as- sembled in an aluminum frame 18 inches long and 9 inches deep, which serves as a panel and coil mounting. Studs projecting from the rear of the casting serve to hold the coils in their proper position and the two small 2 by 3-inch panels, supporting the sock- ets for the radio-frequency tubes, are fastened to the base of the casting with machine screws.

The amplifying apparatus is mount- ed on the 10½ by 4¼-inch panel men- tioned in the list of parts. The loca- tion of the panel and the arrange- ment of the apparatus is clearly shown in the drawing. After the ap- paratus has been mounted and wired on this panel the panel should be fastened to the baseboard with mount- ing brackets.

The tuned radio-frequency trans- formers used in this set should all be purchased with the condensers or home-made. If home-made the sec- ondary winding should have 55 turns of No. 26 double cotton-covered wire wound on a three-inch diameter tube. The primary winding consists of nine turns of the same size wire on a 2¾- inch diameter tube.

The angle to which the coils are mounted in the set should also be noted, as this is the customary posi- tion to minimize electromagnetic coupling and is approximately 57 de- grees.

When wiring radio-frequency cir- cuits careful attention should be given to the location of the tubes in order to keep the grid and plate wires as short as possible.

The Next Job.

After the receiver has been assem- bled and wired as described in this article the next job is to balance the three tuned circuits and the antenna circuit to the same inductance. This is necessary to make it possible for the triple condenser to tune the three circuits to the same wave length simultaneously. To balance the re- ceiver the antenna, ground, batteries and loud speaker must be connected to the set and a powerful local sta- tion tuned in. If it is found impos- sible to tune in a station with the loud speaker, head phones should be connected in its place and the dial adjusted until something is heard.

After the local station has been tuned to maximum volume with the master control of the triple condenser, the antenna compensating condenser should be tuned to gain a further in- crease in signal strength. The next problem is to determine whether the radio-frequency circuits require ad- justment. The master control should be turned back and forth through a few degrees on the dial, and if it is found that there are two points on the dial where the signals are louder it is indicative of the fact that the radio-frequency transformers are not tuned to exactly the same wave length. If this is found to be the case the dial should be tuned to one of the points of maximum volume and the small compensating condensers on the rear of the condenser adjusted until maximum volume is obtained. After this has been done the test just de- scribed should be repeated to make sure that only one peak remains.

Enameled Wire Is Best for Outdoor Antenna

Enameled copper wire is best suited for outdoor antenna. Wire coated in this manner will not become corroded, as is the case when bare copper wire is exposed to the elements. The ad- vantage in preventing corrosion is that the resistance of the antenna cir- cuit is kept at a minimum. This al- ways is desirable.

Drilling Panel

If you have drilled the holes for a condenser or another panel-mounting instrument and find the screws won't meet the threads in the condenser, drill an oversize shaft hole so the condenser can be fitted to the drilled holes.

Lead-In Wire

Lead-in wire should be taken off the aerial at the end pointing toward the section of the country from which you expect to receive most stations.

CALIFORNIA NEWS BRIEFS

In this day of modern motive meth- ods, when the smell of gasoline per- vades all California, it is unusual to see a giant combined harvester of the older type, using a 28-horse team as propelling power. The big harvester on the R. P. Stewart grain ranch at Beaumont, Riverside county, is thought to be the only one south of the Tehachapi still using horses for motive power. The only available driver in Beaumont is Tony Baca, 19- year-old boy who handles the twenty- eight horses with reins to the lead pair, from his high perch projecting well over the team from the harvester. The harvester uses a crew of five men, and cuts, threshes and sacks the grain at the rate of about sixty acres in a nine-hour day, resulting in close to 700 sacks of grain per day.

Wanted! Fifty first class eagles to donate feathers to clothe the Yosem- ite Indian tribe. The Yosemite red- men have worn out the feathered fin- ery of their forefathers and are now looking for more eagles. They relat- ed their troubles to Chief Ranger F. S. Townsley, who is expected to bring home the "feathery bacon." Towns- ley thinks the task a difficult one, so he's asking for help. "Used to be eagles everywhere," said Chief Ung- wah-too-tah, head of the tribe in ad- dressing his appeal to Townsley. "Now, plenty white people," he con- tinued, "no eagles, no real Indian clothes for redmen. Must have eagle feathers quick—get 'em ready for tri- bal dance last two days July."

An expenditure of $3,000,000 must be made from the funds of the Cali- fornia treasury during the next two years as the state government's con- tribution toward the well being of de- pendent children. Outlining the little known work of the state and the coun- ty governments in caring for thous- ands of waifs made public charges by force of circumstances, Mrs. Amy Steinhart braden, head of the state children's aid bureau and secretary of the state department of public welfare, set this sum as a positive re- quirement of the coming biennium in helping to maintain the orphans of California, the half-orphans, the aban- doned children and the children of in- capacitated parents.

Lantern in hand, Joe Rodriquez, White road rancher, near San Jose, undertook to fill the gas tank of his tractor from a 100-gallon drum. He ran for a sack to smother the blaze he saw envelop the lantern, and got away just in time to see the top of the gasoline drum rise a hundred feet in the air with a terrific explosion. A moment later a second drum of gasoline shot its bolt, and shortly afterward Rodriquez and his partner Cintas, were checking up losses of building, equipment and stock, which ran well over $10,000.

An unusual apple pest has been re- ported on the J. R. Talbot ranch at Graton, Sonoma county. The apples on the trees appear to be bruised and on being cut open are found to con- tain dry rot near the surface. The apples have been sun scaled, due to some climatic condition, combined with probable damage from insects or cultivator to the roots of the apple tree, according to County Horticul- tural Commissioner O. R. Bremner.

"The idea held by most people that the poison methods used by the fed- eral and state departments of agricul- ture in the control of predatory ani- mals is cleaning out the fur bearers is wrong," says R. K. Stewart, of the U. S. Biological Survey. "There is a greater mortality among fur bearers in trapping than in poisoning. When small fur bearers get in the coyote traps, they are injured so badly that it becomes necessary usually to kill them."

Los Angeles manufacturers during the first 6 months this year produced goods at an annual value rate of more than $1,300,000. The six months' output of 1926 shows a $25,- 000,000 gain compared to the same period in 1925 and the volume ranks the metropolitan district as seventh among the nation's largest industrial centers, according to figures made public by the Los Angeles chamber of commerce.

Restoration of the Forbestown hotel, built in the fifties and known as an old landmark in the Oroville district, has been completed. The old time barroom has been remodeled and converted into a ball room. The hotel was originally built by Mrs. Eliza- beth Garton in 1859, and saw many mining day parties. Forbestown was once the site of the richest quartz gold mines in this territory.

Farm Adviser C. M. Conner of Tu- lare county says that the soil augur is becoming an indispensable tool on farms nowadays. With the coming of the dry season it should be used con- sistently to enable growers to know how much water to apply, he declares and he adds that a prospective land buyer also should use the augur to determine what is under the surface and to secure soil samples.

An interesting booklet for the farm- er who is interested in the business side of his profession is Bulletin 403 of the University of California's col- lege of agriculture, entitled Farm- Accounting associations. It is by El- win C. Voorheis and deals at length with systems of farm accounting.

George Roberts, Placerville, a vet- eran of the Confederate army and a resident of Eldorado county for the past forty years, is dead at the age of eighty-one. Mrs. Roberts, who survives him also took an active part in the war between the states, carry- ing messages behind the lines.

The city of Los Angeles was worth $44,734,309.06 on July 1, according to a report submitted to the mayor.

Work on the seven-story Hart build- ing in Marysville, which is to be Marysville's "skyscraper," has been started.

The cotton growers of the Corcoran section have perfected the organiza- tion of a unit of the California State Cotton Growers' Association.

The board of directors of the Mer- ced County Fair at Merced, placed its stamp of approval on elaborate ar- rangements for entertainment at the exhibition to be held late in August.

June building permits in Long Beach show a marked improvement over the total for May, 1926 being $503,750 compared to $411,645, a gain of $92,750 for the thirty-day period.

Staging a counter attack, friends of the junior high school at Modesto, presented a petition to the Modesto city board asking the board to con- tinue the junior high school next year.

The Hearst Cannery at Oroville, formerly the Virden Packing com- pany's plant, began operations recent- ly. The plant will work entirely with peaches this year. Between 300 and 500 men and women will be employed.

Dr. J. P. Iverson, chief of the divi- sion of animal industry, California de- partment of agriculture, was elected vice-president of the California Veter- inary Medical association at the meet- ing of the association in Los Angeles.

With the awarding of contracts for construction of the one-story River- dale Grammar school, announcement was made by the school officials that work on the structure will be started immediately and rushed to completion.

With the completion of the new municipal storage reservoir, at On- tario, which it is hoped to have ready for use by the latter part of August the danger of a water shortage will be entirely eliminated for that sec- tion.

Fifty-eight students were disquali- fied for readmission to Stanford uni- versity because of scholarship defi- ciencies last quarter. Of these. 16 were first year students. Fifty-nine other freshmen were placed on pro- bation.

The 1927 state legislature will be called upon by California farmers and shippers to pass a bill amending, co- difying and improving the fruit and vegetable standardization act, it was announced by agricultural leaders in Sacramento.

The Ventura County Ice and Milk company, which has a creamery at Oxnard has signed a contract with agents of the Federal government for supplying about two and a half tons of milk a day to the Soldiers' Home at Sawtelle.

Farm Adviser V. F. Blanchard of Ventura county announces the ap- pointment of Sydney A. Anderson of Los Angeles as his assistant in exten- sion service and farm bureau work. Mr. Anderson has for the past two years been secretary of the Los An- geles county farm bureau.

Among the water permits granted during last month by the state division of water rights were three to the Feather River Power company calling for an expenditure of $7,700,000. This company is now doing construction work on a huge hydro-electric project in the watershed of the North Fork of the Feather river.

Speaking to the point of successful farm accounting, Farm Adviser C. M. Conner of Tulare cuonty has just pointed out that the work of his unit at Visalia, has been most successful during the past year and added inter- est indicates that it may well be pressed again during the coming fis- cal period, which will be done.

A flock of young ducks of pure wild Mallard strain, paddling around con- stantly in their domestic quarters on Dillonwood ranch, at Milo, Tulare county, adds another chapter, this season, to the unique and interesting history of the wild duck as he adapts himself to an environment foreign to his natural setting and instincts.

Sequoia National Park, first nation- al playground to be created in Cali- fornia, is to be greatly enlarged and will be known as Roosevelt Sequoia National Park. Virtual assurance of the two changes was given when the United States senate, without opposi- tion, passed a bill so providing, ac- cording to dispatches from Washing- ton.

Taken by themselves, the 65,944 ar- rests for motor vehicle law violations in California during the last year constitute an alarming figure. But statistics on auto mileage, compiled by the State Motor Vehicle depart- ment for the same period, disclose that there were approximately 170,500 miles of motor travel in the state for every arrest.

Fertilizer shipments and orders have been heavier this summer in Tulare county than experienced in a number of years, it is reported by men interested in the trucking business or in the sale of commercial fertilizer material. The fertilizer is moving in great shipments and truck loads into the orange groves to the foothills on the eastern slopes of the Sierras where it will be spread about later in the fall after the hot weather has ended.

The average cow is very conserva- tive in the way of outer adornment— a bell around her neck, perhaps, but nothing more. She wears all the adornments known to modern flapper- dom, however, on the inside. That doesn't sound possible, but you can ask Dr. J. P. Iverson, chief of the state division of animal industry, if you don't believe it. Postmortem ex- aminations of the most conservative cow during the last year, says Dr. Iverson, have revealed rings, brace- lets, beads, coins and hairpins. And it is found that some cows even dine on nails.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(© by Dodd, Mead & Company.)

Pyrrhus

PYRRHUS, ruler of the Greek King- dom of Epirus, hit on a plan, more daring than original. Born in 318 B. C., only five years after the death of his cousin, Alexander the Great, and while the latter's fame was fresh in the memory of living men, Pyrrhus re- solved to follow Alexander's example and conquer the world. Unluckily for his success, he decided to work west- ward instead of east.

Now, from earliest days, power and progress have always rolled westward, and it has seldom gone well with the Easterner who has tried to check them. Pyrrhus did not realize this, but was destined to learn it.

Greece had for centuries been the foremost barrier of civilization against barbarism; of democracy against despotism. But of late a newer power had sprung up in the western world. This power was first the city and after wards the state of Rome. Rome orig- inally was a small town covering but one or two of the seven hills over which it afterwards spread. It was at first ruled by kings who were elected by the people. Then, when these kings waxed tyrannical, the peo- ple deposed them and formed a re- public that endured for 250 years. The little city grew, conquering all its neighbors and becoming at last the virtual mistress of Italy. In after years it was to rule the whole world. Already, brute strength, subtlety and mental superiority were making its name famous. Greece, on the other hand, had passed the acme of her "Golden Age," and, thanks to luxury and civic dissensions, was on the wane.

It was in 280 B. C. that these two mighty powers of the civilized world first clashed, and that clash did much to mold the future trend of the earth's destiny. For Pyrrhus began his real attempt at universal conquest by crossing the Adriatic and declaring war on Rome. He did this on the pretense of helping the Greek cities in southern Italy that resented Roman rule. With 28,000 men and a herd of trained war elephants Pyrrhus began his march against Rome. The sight of an elephant was unknown in Italy, and the great beasts' presence struck mortal terror everywhere. The people were paralyzed with fear.

Rome summoned all her soldiery and vassals and met Pyrrhus at Heraclea, near the Gulf of Tarentun. It was a furious battle, and the Ital- ians fought gallantly in defense of their land. But the elephants un- nerved them and stampeded their horses. Their closest ranks could not withstand the irresistible charges of the maddened Asiatic brutes. Rome's army was at length forced to retreat. But Pyrrhus' forces were so shattered and crippled by the battle that they could not pursue their advantage. They had won a victory that was costlier than a defeat. The term, "a Pyrrhic victory," used in designating some worse than barren triumph, had its rise from this incident.

The following year Pyrrhus again met and defeated the Roman legions at Asculum, but was once more so weakened by the conflict that he de- rived no gain from it. He fell back on Sicily, a Greek province, and there so offended by his ideas of despotism the people's love for liberty that he lost all chance of aid from them. In 276 B. C. he again invaded Italy, but by this time Rome was prepared against his coming. At a battle near Beneventum he was utterly routed and retreated to Epirus. He never again attempted to conquer Rome.

His dream of world empire had been a fizzle, simply because it was civili- zation and not barbarism that he had attacked. A beaten barbarian is a panic-stricken creature, ready to fawn and grovel before his conqueror. An educated, civilized nation is never wholly beaten.

Alexander, by the very fame of his deeds, struck terror to the hearts of the Persians. The fame and armies of Pyrrhus, backed by the war ele- phants (creatures as terrible and un- usual of aspect to the Italians of old as the dinosaur would be to modern men) could only temporarily baffle the Roman republic. Where there is a true republic there must be thought. Where there is thought there can be no real or permanent defeat.

Pyrrhus, a year or so after his re- treat, was killed in a street fight in Argos, a woman dropping a roof tile on his head from a window as he was slaying her son. To die at the hand of a woman was in those days the direst possible disgrace for a warrior. So, for centuries thereafter, the fate of Pyrrhus was pointed out as a warn- ing to would-be world conquerors.

Alexander, living at an earlier day and having all conditions in his favor, had for the time made himself master of the known world. But he had not attacked a foe more civilized than himself. He had momentarily bound the destiny of the earth to his whim. But at his death the bonds had flown asunder. From time to time in his- tory some one man has risen above his fellows, dominated them and bent them to his will. But only momen- tarily.

There can be no One Man or One Nation rule. The only permanent ruler, as all history shows in count- less instances, is the free Will of the People.

THE OTHER SIDE

Perhaps the greatest bar to the acquirement of real knowledge is the refusal of the average person to look upon "the other side" of a question, particularly one which involves a new idea.

We form certain notions regarding people and things, and having done so we seek for arguments to back up those notions. We have more concern that we shall vindicate our own ideas than that we shall arrive at the truth about them.

Thus we build a Chinese wall about our own intellects and thereby oftener than not shut out the real truth, or at least an important part of it.

For this reason every new idea, however beneficent, that arises in the world literally has to fight for its life.

It was hard to convince people that the earth is a sphere, that the blood circulates, that vaccination prevents smallpox, that yellow fever is only communicated by mosquitoes. These and inumerable other facts now accepted by all civilized people were bitterly combatted by the ignorant, superstitious and narrow-minded majority.

It would seem that in the light of the world's advancement in knowledge, men would be willing to study both sides, or all sides, of every important question; yet few of them do. Hence millions live and die in appalling ignorance, through their own deliberate choice.

THE UNKNOWN SCOUT

At the reecnt annual meeting of the Boy Scouts of America, in Washington, a bronze buffalo medal was awarded to "The Unknown Scout." The inspiration of this award was an unknown Boy Scout in London, who may be living today. This, briefly, is the story:

Some years ago, William D. Boyce, a Chicago publisher, lost his way in a London fog. A young lad, noting his embarrassment, approached him, and briskly saluting, said: "May I be of service to you?" Mr. Boyce inquired the way to his destination and the lad showed him the way. Reaching the place, Mr. Boyce offered the boy a shilling for his service, but the boy said: "I am a Scout; and Scouts do not accept tips for courtesies."

Mr. Boyce was interested and impressed. He asked about the Scouts. His young friends took him to the office of Sir Robert Baden-Powell, founder of the movement, and as a result when Mr. Boyce later sailed for home he brought a trunk full of literature pertaining to scouting. Then he started the Boy Scout movement in America, with the aid of others who recognized the value of such training as it affords.

The medal awarded to "The Unknown Scout," who befriended Mr. Boyce and thus caused the spread of scouting in America, was presented to the International Scout Bureau in London, where it will be kept as a permanent memorial. It is inscribed as follows:

"To the Unknown Scout, whose faithfulness in the performance of the Daily Good Turn brought the Scout movement to the United States of America."

Perhaps never has a simple act of kindness brought forth greater or more beneficial results than that performed by this unknown London Boy Scout.

SUCCESS IS NO CRIME

It seems difficult to convince a certain section of our citizenship that a successful man or institution can be honest. People of communistic tendencies pretend to believe that all virtue is reposed in those who are shiftless, improvident, inefficient, and consequently unsucessful.

As soon as some one through intelligent effort rises above the average, either in intellectual attainments or in the accumulation of wealth, the soap-box orators consider him a fair target for their shafts of invective and condemnation.

As a matter of fact, honesty is not an exclusive attribute of any class. A majority of men, both rich and poor, are honest, when measured by reasonable human standards. And a minority of men, both rich and poor, are dishonest. Each should stand or fall upon his individual merits.

In a recent speech, W. E. Humphrey of the Federal Trade Commission expressed a reasonable view with regard to business concerns. He said, in part:

"We do not believe that success is a crime, or that failure is a virtue.

"We do not believe that industry, economy, honesty and brains should be penalized; or that incompetency, extravagance, idleness and inefficiency should be glorified.

"We do not believe that big business and crooked business are synonymous. True, we give closer scrutiny to big business, because of its greater power for good or evil.

"We believe that 90 per cent of American business is honest; we want to help this 90 per cent of honesty. We want to control or destroy the 10 per cent that is crooked."

To any fair-minded person, Mr. Humphrey's attitude must appeal as being eminently sound and equitable.

AN ARTIST'S VIEW

Feodor Chaliapin, world renowned Russian basso, must be credited with political as well as musical sense. In a recent radio address to his fellow countrymen who are struggling under the Soviet government, he said:

"America and not Russia is the real workers' republic, for there the people get what they work for. Give a workman what he needs and he will give you all he has to give. Then you will have neither revolution nor strikes. America's real strength is not in its gold, but in the will to work which American workmen have, and the opportunity to work out their own salvation."

"This quaint but direct philosophy strikes to the root of the question of government,'" says the Wheeling, West Virginia, Intelligencer. "The Constitution of the United States provides more than personal liberty under the law and the free institutions through which the law operates. The Constitution permits the American people to have exactly the kind of government they desire. Even the Constitution itself permits the change to come in accord with new conditions. The electorate alone, of the whole nation, is the supreme power.

"Under such government is is but natural that a people, characteristically industrious, energetic and broad-visioned, should pattern their economic and social institutions and practices along the same line. That is why we have democracy in industry and democracy in social life to a degree unheard of in any other country."

President Cooledge told reporters that the dumb-bell excercise he got at Amherst had helped him through life. It possibly helped him in dealing with dumb-bells encountered in Washington.

The mayor of Atlantic City complained that he was overcharged by a Louisville taxi driver. Why didn't he take a boardwalk wheel-chair along.

CURIOUS CUSTOMS

Among the peculiar customs which have influenced mankind, one of the most interesting, as well as amusing, is that system of religious prohibitions known as taboo. This system attained its fullest and most complicated development among the native island inhabitants of Polynesia, from Hawaii to New Zealand, but its traces may be discovered in most parts of the world, even among civilized people.

The word "taboo" in its ordinary sense means set apart or sacred, and the persons or things so set apart were usually designated by kings, chiefs and priests. A taboo might be general or special, permanent or temporary. For example, in Hawaii, the flesh of hogs, fowls, turtle and certain kinds of fish were taboo in favor of gods and men, but were not to be eaten by women, except in special cases.

Certain periods of religious ceremonies were marked by strict taboos, during which all fires and lights were extinguished, no canoe was launched, no one bathed, no dog might bark, no pig grunt, no cock crow. The animals were caused to observe the taboo by having their mouths tied up.

In New Zealand the places where great chiefs had rested were taboo or sacred, and fences were placed around the spots, so no one might tread thereon. The head and hair, especially of a chief, was taboo, and not to be touched by himself or others. When a chief inadvertently touched his own head or hair, he had immediately to hold his fingers to his nose and sniff up the sanctity which had been extracted from his head by having touched it.

It was believed that as a penalty for the violation of certain taboos the offender would swell up and die, but the priests were able to prevent such dire consequences by performing certain mystical ceremonies, for a suitable fee. Violations of a taboo were often punished by death, or at least by a sort of judicial robbery, whereby the unlucky violator was despoiled of all his property.

These are only a few of the innumerable strange customs associated with the taboo and its attendant superstitions. But if we will but look around us, we may discover beliefs and customs in vogue today which are not far removed from those of the native Polynesians, so far as rationality is concerned.

AVIATION IN RUSSIA

The recent stop in Moscow of Evans and Wells, Americans, who are trying to break the record for circling the globe, brought to attention the great interest in aviation now being shown by Russia.

In Moscow the travelers were banqueted by the Aviakhim, a great Russian volunteer society formed for the promotion of aviation. This organization is said to have 3,000,000 members paying dues, formed into 30,000 local branches. In three years it has given to the Soviet Republic 150 airplanes, twenty-five airdromes and twenty-five hangars, together with much equipment for fighting farm pests and forest fires.

The Aviakhim offered the American travelers the facilities of its scores of stations stretching across the country betwen Moscow and Omsk, a distance of 1,500 miles, and sent as their pilot the famed Korpilof, who though only 29 is a veteran of the World war and considered one of the world's foremost airmen.

In spite of the conflicting and usually unfavorable reports which come to America concerning conditions in Russia, it appears that there has been a great awakening in that hitherto unhappy country. At least, such a conclusion must be drawn from from the great zeal and activity shown by the Aviakhim.

EDUCATIONAL REFORM

Earnest educators throughout the United States are giving serious conseration and thought to a reform of curricula, with a view to better adapting them to the needs of the present-day student. No current question deserves more thoughtful consideration.

It is no reflection upon our educational leaders that present methods are proving inadequate to the demands of the times. With the ever-increasing store of available knowledge, it becomes more and more difficult to choose that which should be taught in the limited time that can be given to formal education by the average student.

But the problem is not new. As far back as 1758 the prevailing system of education in England came in for drastic criticism by Thomas Sheridan, who labored with little success for its reform.

Sheridan contended that the established system of that day did not fit the young for their duties in life; that it was uniform for all and profitable for none; that special training should be given for the various professions. He also stressed the importance of imparting a better knowledge of the English language.

The latter point, at least, might well be taken to heart today. It would be a great step forward if our children might emerge from the high school with a reasonable acquaintance with their mother tongue.

Author Harold Bell Wright is now the head of an extensive cattle ranch, where he should find material for some bully new novels.

CALIFORNIANS' WORK PRAISED

Under the heading, "Not an Ounce of Bunk in a Ton of Advertising," Californians, Inc., San Francisco's non-profit organization for the advertising and developing of Central and Northern California, is described in an article in the current issue of "The Arkansas Banker" as the most successful organization of its kind in America."

Californians, Inc., in the article, is held up for emulation by the business men of Arkansas, who recently have formed a commitee for promoting that state. The "phenonemal rise of San Francisco's bank deposits, building permits, real estate sales, water connections and postal receipts" since the Californians' advertising campaign began, together with the minimum of expenditure for staff organization, especially impressed the Arkansans the article states. It continues:

"New settlers definitely obtained by Californians, Inc., represent a dividend of $75,000,000 in one year on an investment of $400,000, not to mention advertising which reached 33,365,751 readers, or 212 reels of motion pictures, which were seen by an additional 5,000,000 people."

RECREATION AND TOURING TRAVEL

The tide of summer recreation and touring from California north into Oregon, Washington and British Columbia has already become large and promises much to exceed that of any former year. Tourists who cross the continent to California are more and more learning that a motor trip along the entire Pacific Coast offers more of enjoyment and scenic beauties and wonders than are found along any of the routes across the continent.

This knowledge is increasing travel up and down the coast by eastern tourists. Our own people are learning of the enjoyment of such a trip, and the number of Californias who motor north in the summer time is increasing. Also more who live in the Pacific Northwest are using the great connecting artery of the Pacific Highway to enjoy the beauties and comforts of California.

The Oregon Highway Commission made a traffic census June 16 at the key point at Grant Pass, where the Pacific Highway is joined by the Redwood Highway. This census showed a total of 4419 cars passing that point that day, of which 3670 were on the Pacific Highway and 749 on the Redwood Highway. Of these cars, 728 bore licenses of states other than Oregon, 552 of them on the Pacific Highway and 186 on the Redwood Highway. Of the total of 728 foreign cars, 542 bore California licenses, showing the importance of California travel to the states of the north. This north and south travel along the whole Pacific Couast will undoubtedly be stimulated by the new movement for joint publicity of all the coast states.

How this summer traffic compares with winter travel is shown by the census taken by the California Highway Commission January 18 and 19 last where the two highways cross the state line between California and Oregon. This showed for the two days a total of 656 cars, of which 61 were on the Redwood and 595 on the Pacific, which is the only real winter route. Much of this winter travel is of nothern cars going and returning from California.

FOURTH SYMPHONY CONCERT SCHEDULED FOR SUNDAY

Ossip Gabrilowitsch is to direct the next open air concert on Sunday, July 18, in Hillsborough, at 3:15 p. m. Great interest is manifested in this, the first Pacific Coast appearance of Mr. Gabrilowitsch as orchestral conductor. As a pianist of international fame, Gabrilowitsch is best known to the musical world. He has already established an enviable reputation as being one of the greatest concert pianists of the present day, and has been frequently heard in recital in San Francisco and other California cities. In recent years he has held the post of conductor of the Detroit Symphony Orchestra, and in this capacity has won additional laurels wherever he has appeared. Seldom a musician wins fame in two separate branches of musical art, which gives Mr. Gabrilowitsch a unique place among the great world figures in modern music.

This is the fourth symphony concert in the summer series under the auspices of the San Mateo County Philharmonic Society.

HARPER INDUCED TO REMAIN BURLINGAME'S POLICE CHIEF

John J. Harper, Burligame's chief of police, who had been a candidate for sheriff, has formally withdrawn from the race, having decided to remain at the head of the Burlingame police force. It is understood this decision was the result of an increase in pay and improvement in the police department offered by the board of trustees as an inducement to remain in his home community.

LAND OF MODERN MIRACLES

In the United States there are 16,500,000 telephones, 17,000,000 have pleasure cars, 16,000,000 have phonographs, and 6,000,000 have radios. Radio business this year is expected to reach $600,000,000, a gain of $100,000,000 over 1925.

Until as many homes have radios as now have phonographs or phones, there is bound to be an unexploited unfilled new field in which to sell radio supplies and service. Every farm in the nation is a prospect for radio, for nothing puts the farmer in touch with the markets more quickly.

On exibition in New York is the world's largest washing machine, probably designed for handling dirty political linen.

Colma News Notes

SYLVIA HAUBRICH FISCHER

Louis Varni and a party of friends ent last Sunday at Searsville Lake.

Ben Haubrich, of Mission street, de a business trip to Redwood City e day last week.

Mrs. William Sweeney, of Mission eet, is enjoying a vacation at Rio do, on the Russian river.

Stephen Fischer spent last week end "Sobre Las Olas," the Haubrich nmer home at Capitola by the Sea.

Miss Helen Bertini, who recently d her tonsils removed in the South n Francisco hospital, is recovering ely.

Miss Thelma Selmi has resumed duties at the M. Belli Company ocery store, after a vacation of ee weeks.

Mr. and Mrs. Mitchell Farmer ibera Botteo) have returned from ir honeymoon and are now residing the Crocker Tract.

Mrs. Ruby O'Connor will entertain members of La Fiesta Social Club her home on Chenery street on iday evening of this week.

Mr. Martini, who was shot and iously injured in a duel with rob-rs, has returned home from the spital and is recovering nicely.

Mr. and Mrs. Frank Beffa and ldren, Vivian and Frances Beffa, Tracy, are spending several weeks re at the home of Mrs. Annie B. uer, of Price street.

Plans are beng made for a monster zaar to be given for the benefit of e Colma Volunteer Fire Department ring the latter part of August. eryone in the community should sist this affair, as the proceeds will used to purchase a lot for the fire use. Watch these columns for the te of this big event.

Mrs. Harry Denman, of San Pedro, is seriously ill at St. Mary's hospital in San Francisco.

Mr. and Mrs. Ellis C. Johnson spent several days at their summer home near Lunitas Glen.

Miss Margie O'Connor and a party of friends spent an enjoyable holiday at Casa Del Rey, in Santa Cruz.

Misses Rose and Inez Merlo have returned from Salinas, where they spent several days with relatives.

Work is progressing rapidly on the beautiful new home being built on First avenue by Mr. and Mrs. G. Belli.

Mrs. Beatrice Batz left Sunday with relatives for Los Angeles, where she will spend her two weeks vacation.

Mrs. A. Gowland and Miss Daisy Gowland have returned home from Sycamore Grove, where they spent two weeks.

Mr. and Mrs. Widasky, of East Lake avenue, are spending an enjoyable vacation and fishing trip at Fort Scott and Fort Baker.

Mrs. Widasky entertained Mr. and Mrs. Poitz and Elton Poitz, of San Francisco, Thursday evening, at her home on Eastlake avenue.

Mr. and Mrs. Joseph Altieri and son Joseph, Jr., have returned home from the Yosemite Valley, where they spent an enjoyable vacation.

A number of local people attended the whist party and dance given in the Daly City Auditorium for the benefit of the St. Maximus church.

Mr. and Mrs. Simpson Ballenger are the proud parents of a baby boy, born in San Francisco last week. Mr. and Mrs. Wilton Ballenger are also parents of a baby boy, born last week in Los Angeles.

A successful whist party and dance was given last Saturday evening for the benefit of the Colma Volunteer Fire Department. A large crowd was present, and all seemed to enjoy the evening to the utmost.

A monster whist party will be given in the Daly City Auditorium on August 11 by the members of El Carmelo Parlor No. 181, Native Daughtesr of the Golden West. Miss Laura Figone is in charge of the affair.

P. L. Peterson, of the Colma Garage and Machine Shop, is one of the busiest men in Colma these days, selling tires and caring for his automobile repair business. If you contemplate building a radio, see Mr. Peterson.

Don't fail to attend the whist party and dance which is being planned for the month of August by the members of El Carmelo Parlor No. 181, Native Daughters of the Golden West This affair will be held in the Daly City Auditorium. You are promised an excellent time.

G. Casentini, who for many years was in the employ of M. Belli & Co., and later in partnership in the Colma Grocery, will open up shortly in the Olcese building with a full line of fancy groceries and imported goods. Mr. Casentini has a large circle of friends in Colma and vicinity who wish him success in his new venture.

Mr. and Mrs. L. Bagalupi are the proud parents of a baby boy.

Mr. and Mrs. M. Lloyd are remodeling their home on Mateo avenue.

Mr. and Mrs. D. Bertini are spending their vacation at Fetter Springs.

Misses Helen and Angelina Rogers, of Winters, have been visiting Mrs. T. Conserva.

Mrs. Twesten and family are spending an enjoyable vacation at Guernewood Park.

Mr. and Mrs. Williams Fuchs and children are enjoying their vacation at Santa Cruz.

Mr. and Mrs. Farando entertained Mr. and Mrs. F. Sargenti, of Oakland, Sunday evening.

Louis Nava and Joseph Mehlo spent one evening last week visiting John Clavi, of San Francisco.

Mr. and Mrs. L. Jost and William Jost have returned from their trip to Eureka and Mt. Shasta.

The El Carmelo drill team will hold their regular meeting at Daly City Auditorium Friday night.

Don't forget the whist party and dance to be given by the Native Daughters of the Golden West, El Carmelo Parlor No. 181, in the Daly City Auditorium, August 11.

Miss Zeila Ballenger, who formerly resided in Daly City, has become the bride of Mr. Elmer Erickson, of San Francisco. Mr. and Mrs. Erickson will reside for a time with her parents.

Last Sunday evening Mr. and Mrs. Alfred Zanetti entertaned Mr. and Mrs. James Merlo, Mr. and Mrs. Joseph Merlo and daughters Rose, Inez and Lorraine, Mr. and Mrs. Louis Nava and sons Louis, Jr., and Robert, and Mrs. James Moresco.

C. A. DIBBLE SEEKS OFFICE OF CONSTABLE

C. A. Dibble, of Burlingame is a candidate for the office of constable of the First township. Mr. Dibble is engaged in the real estate business on Broadway, Burlingame, under the firm name of the Broadway Realty Company.

Mr. Dibble has lived in the southern end of the township, in the Easton

C. A. DIBBLE

section of Burlingame, for the past fourteen years. He is well and favorably known in that section.

Mr. Dibble is a man of sterling qualities, a successful business man, and feels that his section of the township should be favored with one of the offices of constable. He is a large property owner and taxpayer, and promises if elected he will give the office good, clean service. —Adv

BLUE MONDAY GONE

One of the greatest benefits of modern times is the up - to - date laundry. The hours formerly spent in hard, unpleasant work are now given to womankind, free from all drudgery of washday, and the exhausting labor of ironing piles of clothes every week has been banished from the life of the modern housewife. The laundry has in this way added two days to the week of the present day woman. The scientific cleansing processes of the modern laundry assure the highest quality of perfection in cleanliness, purity and finish.

The Sing High Laundry, located at 1315 Pine street, whose phone number is Graystone 1570, is one of the finest examples of what a laundry should be. Their equipment is the latest known in the laundry industry, and this enables them to turn out the very best class of laundry work. This means that the clothes are brought back in all their original richness, means sweet-smelling, clean white linen, and that the most delicate garments may be sent to them in perfect safety. They offer a complete service for all your washing, and every piece is returned spotlessly clean and beautifully finished at a nominal cost. Shirt and collar service is a specialty with them. Men who appreciate collar comfort and style send their collars to them, as a correctly laundered collar gives a neat and well dressed appearance to any man. Their special facilities for cleaning fine blankets, comforts and curtains insure the finest kind of finished work.

This modern and progressive laundry solicits trial of your work, and we believe you can do no better than entrust your work to its care. —Adv

ALL YEAR ROAD TO YOSEMITE VALLEY

The all year road from Merced to Yosemite Valley, California's greatest recreational highway, will open as scheduled on July 31, and will remain open permanently after that date.

This is the official announcement of Harvey M. Toy, chairman of the California Highway Commission, following his return from a final inspection trip over the construction work in Merced canyon.

"Saturday, July 31, was set for the opening date by Governor Friend W. Richardson, and the road will be ready on that day," said Chairman Toy. "Several bridges will be in an uncompleted state, but this will not interfere with comfortable travel over this marvelous highway which opens at all seasons California's supreme scenic attracti n."

Indica ive of what the highway means to motorists, Chairman Toy explained that he had breakfast in Merced, drove to Yosemite Valley and spent over four hours there in conference with officials and was back in Merced in time for dinner. Stops were made enroute to visit the historic old court house at Mariposa and the prison camp at South Fork. He returned to San Francisco by automobile the same evening.

History of Yosemite Highway

That section of the Yosemite highway from Merced to Mariposa was constructed under the first bond issue and was originally planned as a county seat lateral. The portion from Mariposa to El Portal, including the section in Merced canyon, was added to the state system by the second bond issue of 1915. Prior to state construction there was no existing road over this section of the route.

From the National Park boundary, just beyond El Portal, to Yosemite Valley, the road is under jurisdiction of the federal government, and is now being paved under congressional appropriation.

Construction of the Merced canyon unit, of 16.5 miles outside the park, Chairman Toy explained, was authorized by the present highway commission. While the project was not on a trunk highway or interstate connection, it was considered a major recreational highway of such importance to both state and nation that its construction at this time was fully justified. This view was approved by Governor Richardson and a convict camp operating under the new pay law was established in November, 1923.

Modern Equipment Speeds Work

The state highway in the Merced canyon is the outstanding convict-built road of the country, and may well be considered a monument to the California plan of "building men and roads."

To conquer the rocky walls of the canyon required over 800,000 pounds of powder. In less than three years over 1,000,000 cubic yards of earth and rock have been moved. The modern equipment in the job included five steam shovels, air compressors, a whole fleet of trucks, two crushing plants for the production of surfacing material, and a great deal of smaller machinery.

High Standards Feature New Work

The cost of grading and surfacing the 16.5 miles, including the cost of building five bridges, will be approximately $1,200,000. The road is built on high standards with a minimum roadway width of 26 feet, which in many places has been increased to more than 30 feet. There are only two curves with a radius of less than 500 feet, and on the whole the curves are not as sharp as on the railroad on the other side of the canyon.

An average of 180 prisoners from San Quentin and Folsom prisons has been employed and on July 1 their earnings had reached a total of $56,217, of which $18,516 had been allotted to dependents. Six prisoners have been killed during the progress of the work.

Shows Progress of Road Building

With the opening of the new section the entire trip from Merced to the park boundary may be made with ease with only one summit of 2,973 feet to cross. The trip will demonstrate forcibly the progress of California road building. The older sections approaching Mariposa were built on standards of a decade ago; the nearer the park boundary the traveler gets, the wider and straighter the road becomes.

In anticipation of the great volume of travel expected over the highway following its dedication, the highwty commission has authorized oiling of a considerable section of the road. The entire route will be open July 31, as originally planned. From that date on motorists should encounter no difficulty in reaching the incomparable Yosemite at any season of the year.

All lovers of whist are inivited to attend a whist party on Wednesday afternoon, July 21, at 2 o'clock, in St. Maximus social hall, Daly City, for the benefit of St. Maximus church, under the direction of Miss Margaret Mary Steele. Many beautiful gifts have already been donated for the occasion. Come and bring all your friends.

Misses Alvina Jost and Marie Anderaggen have left for the Russian river, where they will spend their vacation.

MOVE TO WIDEN PAVED HIGHWAYS

The move to widen paved highways is well under way in many states. Contracts have been let for widening portions of the paved road on the famous Pacific highway to 30 feet. This will give ample room for three lines of moving vehicles.

Ten years ago no one would have dreamed of the traffic that goes over the roads today. It is impossible to predict what it will be ten years hence. If the railroads go into the motor truck and bus business on an extensive scale, as now seems entirely probable, 30-foot highways will be entirely inadequate to handle the traffic. One-way roads will then be a necessity.

Oregon has an unexcelled road system in addition to its paved trunk highways; it is building wonderful crushed rock macadam roads into every section of the state. These roads are established on a permanent grade. As rock is added and packed down, it produces a base which is almost equal to solid stone. As traffic requirements demand it, this base, which carries the load, can be covered with a waterproof, shock absorbing surface of a bituminous character, at a minimum of expense, thereby utilizing every dollar taxpayers have expended for road purposes.

The widening of the highways, however, is a problem that must be solved, it becomes more evident every day.

SEARCH FOR MAN RECALLS MURDER OF YEARS AGO

Carl J. Coburn, wealthy resident of Pescadero and a figure in one of the most sensational murder mysteries of San Mateo county some years ago, "either conceals himself or has left the state," it was stated in an affidavit filed Tuesday in San Francisco by the Prudential Securities Company, seeking to recover an automobile.

Friends declared they had seen Mr. Coburn on the streets of Pescadero, his home town. At the same time the affidavit filed by the finance company stated that mail addressed to Coburn had been returned "unclaimed." Permission was asked of the court to serve a summons on the Pescadero man by publication, on the ground that he can not be reached by mail. The petition was granted by Judge Fitzpatrick, of San Francisco. The complaint for the recovery of the car alleges that Coburn failed to keep up payments on a purchase contract.

Coburn, nephew of the late Loren Coburn, Pescadero millionaire, is said to have inherited more than a million dollars at the death of Mrs. Sarah S. Coburn, found murdered in her bed at her home near Pescadero several years ago.

TAKING UP REFERENCES

One of the best guarantees of fitness for any job is bodily fitness and perfect health. Young Samson's references are fine—He's been brought up on plenty of Excelsior Ranch's milk.

The AMERICAN LEGION

(Copy for This Department Supplied by the American Legion News Service.)

BRITISH WAR HERO APPEALS FOR PEACE

Eloquent appeal to the American Legion to make "the preservation of peace the foremost, quite the foremost place in your program" was voiced at a recent meeting of the national executive committee of the Legion at national headquarters at Indianapolis, Ind., by Lieut. Col. George R. Crosfield of London, British World war hero and now president of Fidac, the interallied veterans' federation in which are joined 10,000,000 veterans of the World war in the nine principal allied countries.

"I do ask you to do this," Colonel Crosfield said at the conclusion of his address to Legion leaders assembled from all parts of the United States, "for the sake of the dead, for the sake of the living, for the sake of the widows and orphans; coming in with all your force, and all your energy and your youth and your enthusiasm, to guide the directing finger that 'writes and, having writ, moves on'—to guide it away from death and destruction to life and construction."

The appeal of the one-legged hero met with instantaneous response, as a wave of cheering rolled over the senate-like chamber and national officers and members of national committees joined to applaud to the echo this appeal from the representative of their former comrades-in-arms, signifying their sympathy with Fidac's purpose to "guide the directing finger away from death and destruction towards life and construction."

The national executive committee then directed the appointment of a committee to draw a message expressing to the veterans of the allied countries the feeling of "understanding and friendship" of American Legionnaires for them. On that committee were: H. Nelson Jackson, chairman of the Legion's world peace and foreign relations commission; Henry D. Lindsley, past national commander; Joseph M. Thompson and Thomas A. Lee, members of the world peace commission, and J. Monroe Johnson, member of the national executive committee.

The message, unanimously adopted by the national executive committee, was:

"We send our friends abroad our sincere greetings and our warm assurance that the spirit of admiring comradeship born on the field of battle and tried in the fire of common combat for the freedom of the world burns undimmed in our hearts and that it is our earnest hope that after the gloom of reconstruction will dawn once more a more glorious day of everlasting peace among the nations of the world.

"We earnestly look forward to that time when justice and fair dealing shall be the only considerations entering into adjustments between nations and prejudices and partisan politics shall not influence even in the slightest degree those who determine the destiny of the peoples of the world."

Take Steps to Combat Pacifist Propaganda

Active steps to combat radical pacifist propaganda against the national defense program of the United States, and particularly against military training in the schools and colleges of the country, are being taken by the American Legion.

At a recent meeting of the Legion's national executive committee, printing and distribution in large quantities of a pamphlet, setting forth the value of military training in colleges and exposing the character of the propaganda against it, was ordered.

The pamphlet was prepared under the direction of a national defense council formed by the Legion. This consists of Brig. Gen. L. R. Gignilliat of Culver, Ind., chairman; Vilas Whaley of Racine Wis., and Howard P. Savage of Chicago, Ill.

Proper Care of Insane Veterans Is Demanded

Enactment of state laws to facilitate the commitment of insane World war veterans to veterans' bureau hospitals is being urged by the national rehabilitation committee of the American Legion at Washington.

Members of the committee point out that proper care and possible cure of insane veterans is being prevented by well-meaning but misinformed relatives, who take the veterans under treatment from the hospitals before satisfactory improvement or cure has been accomplished. Under present laws the commanding officers of the hospitals have no right to prevent a patient's removal. The laws would allow legal commitment and would assure that everything possible would be done to bring about a cure, the Legion officials maintain.

Evidence

"I always do the little things well," announced the lunch-counter clerk.

"I see," nodded the customer. "So that's how you got this job of making sandwiches."—American Legion Weekly.

WARNING AGAINST KNIGHTS OF ROAD

Practice of "Picking Up" Strangers Proved by Records to Be Harmful.

With the opening of fine pleasant weather the "sons of Esau," who have been "holed up" are again afoot on the highways of the nation, according to a motorist who doesn't follow the practice of "picking up" strangers on the road.

These restless souls, made impatient by an enforced sojourn in one place for the months of the rains and cold, are now in a hurry to be "going somewhere else."

Going Anywhere.

They are going north or south and some east or west. Few know whither they are going or how far. All that seems to interest them is a change of scenery, a new environment, new faces.

No matter on which highway one travels nowadays there one will see numbers of these "birds of passage" trudging along the road going somewhere, anywhere.

Some of them are honest workers who are seeking new jobs, and lacking the necessary railroad or stage fare, are making the journey on foot. But most are merely "tramps," "weary Willies," "bos."

There was a time when these latter "birds of passage" made a practice of giving their "patronage" to the railroads exclusively when they made their "long jumps." They rode the rods or blind baggage and the "side-door pullman" was travel "de luxe" to these gentry.

In recent years they have made a radical change in their methods of travel. The increasing number of passenger automobiles and trucks has been making the highways easy for them. Now they travel by auto—when they can.

And that is just the trouble. They so very frequently can and do. Motorists, most of whom are far more kindhearted and generous than they should be for their own good, do not hesitate to stop on signal from these "knights of the road" and carry them as far as they desire to go.

Regret Generosity.

There are many instances where autoists have regretted this generosity. It has resulted in their being found on the roadside, sans auto, sans purse and almost sans life itself.

Police annals throughout the nation are full of such cases and yet human nature is such that motorists will keep on doing the same thing time after time, heedless of the warnings contained in newspaper accounts of theft and almost fatal assaults by members of this army of "ride-grafters."

The wise motorist is he who will not give a "lift" to these gentry; who will go on his way unmindful of the stop signal so urgently waved in his path.

Study Oil Viscosity and Torque Needed to Start

Some attention has been given by the bureau of standards, Department of Commerce, to the relation between oil viscosity and the torque required to start an automobile engine in rotation or to bring it up to a given speed. From the results thus far obtained it appears that while the viscosity of the oil does have a pronounced effect upon the power required to crank the engine at speeds of 100 r. p. m. and higher, it does not have any appreciable influence upon the torque required to start the engine rotating.

Keep Glass Clear

Among the new laws affecting motorists in New York state are: The windshield and rear windows must be kept clean from posters. A license plate must be clearly visible on the front of the car. Manufacturers and dealers are required to register the sale of new cars.

Six Ways of Being Good Driver Told by Expert

Seven nationally known traffic and safety experts were asked to state what they believe were the characteristics of a safe and good driver. An analysis of the opinions submitted show that the men all agreed on the following major essentials of good driving:

1. The good driver has a high degree of self-control at all times, this control manifesting itself in various ways.

2. The good driver always maintains his car in such shape that it responds easily and quickly, thus assuring control of the car as far as the purely mechanical equation is concerned.

3. The good driver regulates his speed in accord with the conditions of the road over which he is traveling and never travels at such a rate that he cannot stop it within the "clear course" ahead.

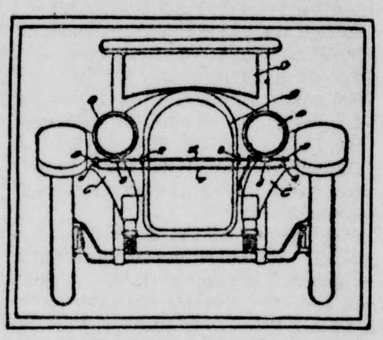
4. The good driver invariably exercises due regard for the rights of others and always applies the simple axioms of courteous behavior.

5. The good driver accepts the safety of the pedestrians as a primary consideration.

6. The good driver keeps his mind on the road ahead, as day-dreaming or chattering at the wheel causes many more accidents than are caused by bee stings.

Mechanism for Headlights

The illustration shows an adjusting mechanism for vehicle headlights, comprising a rod extending transversely across the front of the vehicle, having conical-shaped recesses in its ends, a brace rod arranged parallel with the first rod and having its ends



Adjustable Rod for Lights.

secured to the fenders of the vehicle, brackets supported by the fenders at each end of the first rod, adjustable bolts carried by the brackets, pointed ends on said bolts for engagement in the recesses of said first rod, a foot pedal and adjustable connection between the foot pedal and the first rod for imparting movement thereto.

Always Release Clutch When Rounding Corners

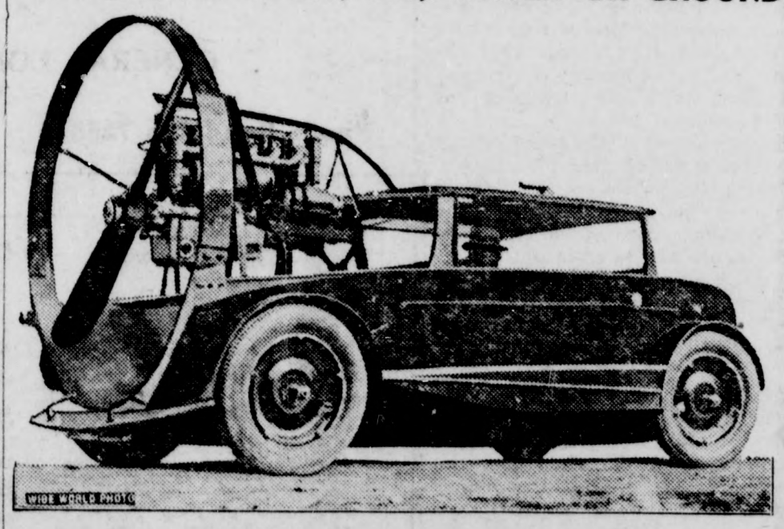
Always throw out the clutch when rounding a sharp corner. It has a beneficial effect upon the tires. Whenever the car tends to skid, due to its deflection from the straight course, a cross strain is brought to bear on the tire treads, which is directly proportional to the weight of the vehicle and the radius of the curve and proportional to the square of its velocity. If the power is applied in rounding a curve, the tendency to rip off the tires is further aggravated by the backward drag due to traction. If the clutch is released, however, the factor is eliminated and the strain is thereby reduced.

Auto Operators Advised to Start on Low Speed

When starting down a very steep grade it is advisable to place the gears in low speed. The rear wheels will then turn the engine, a movement requiring considerable effort. This produces a very good braking effect. A light car on a moderately steep hill will stop, and a heavy car will move slowly, but always under control. This is called "using the engine as a brake."

It should be practiced from time to time, so that the driver may become familiar with the method. If all the other brakes fail, this is the best and only thing to do. Practice the trick frequently, so that it becomes as easy as any other operation, and you will have cause to be thankful if ever the need arises to use it.

TRAVELS ON SNOW, ICE, WATER OR GROUND



George McLaughlin, a Bangor (Maine) garage man, has invented a machine which is capable of traveling on snow and ice, water and ground. It is equipped with a 70-horse-power aeroplane motor and will make 60 miles an hour on the road. It has airtight pontoons on both sides under the running boards, the top is constructed of wood boards in two layers crossed, with waterproofed canvas between both, to make it watertight. It is steered by the front wheels on both land and water, having no rudder. It will carry five passengers comfortably and is large and roomy; in looks, finish and equipment it equals the best limousines. Photograph shows a side view of the novel machine.

Daddy's Evening Fairy Tale

MARY GRAHAM BONNER

COPYRIGHT BY WESTERN NEWSPAPER UNION

ANNIE SPEAKS AGAIN

"There is something else I must tell the people when they come to the zoo today," said Annie Alligator.

"What is it?" the other alligators inquired.

"I told them the great, the tremendously important, difference between alligators and crocodiles—in their looks—so that people would know us from them, and them from us, when they came to visit the zoo!"

"You did," said the other alligators. "You said it would be your last address or speech of that sort. Or, at least, you said it would probably be your last.

"You left a chance for yourself in case you wanted to say more, and we all thought you would want to say more, and that you would want to make another speech or address."

"True, so you did," said Annie. "Well, you were right. You knew what you were talking about.

"You understood.

"Well," Annie continued, "I think now that I should tell them something else.

"I spoke about heads the other day."

"You spoke then as though you might have to repeat the same speech or address another time," said the other alligators.

"True, so I did," said Annie, "but this time I think I will tell them something else.

"In fact, I think I should tell them something else.

"Yes, I spoke about heads the other day. I told them of the difference between alligators' heads and crocodiles' heads.

"I explained that we had fat heads and square heads and that their heads were pointed.

"Now I think I should tell them something about the difference in tails.

"I like extremes.

"Tails are so interesting."

"Maybe people would not be interested in tails," said one of the other alligators.

"People haven't tails."

"Poor people," said Annie, "but they would be interested in knowing

Tails Are So Interesting.

the difference between our tails and crocodiles' tails."

"Well, maybe," said the others.

"What will you tell them, Annie?"

"The truth," said Annie solemnly. "I always believe in telling people the truth.

"I will tell them that our tails are also fatter and not so silly and flat as are the tails of crocodiles.

"I will say:

"'Ladies and gentlemen, boys and girls, visitors to the zoo,
Listen to me, listen to me, while I speak to you!
Our tails are rounded and much more fat,
Than the tails of crocodiles, which are flat.'"

"Dear me," said one of the other alligators, "must you speak in poetry?"

"I don't have to speak in poetry," said Annie, "but I like to, and an alligator poet is so unusual.

"I've heard of one before. Then I think people might remember that little rhyme.

"So I am doing a double service. I am giving them information and at the same time I am giving the alligators an alligator poet."

For poor Annie Alligator actually flattered herself that she was a poet—poor, silly Annie Alligator!

But then the information that she gave was correct, and of course she didn't know much, if anything, about poetry. It is always a help, if you want to think yourself fine and smart, not to see what others are doing.

When you see what others are doing you don't think so much of yourself.

That was why Annie Alligator thought she was a pretty good poet!

A Smile

The more than usual lack of intelligence among the students that morning had gotten under the professor's skin.

"Class is dismissed," he said, exasperatedly. "Please don't flap your ears as you pass out."—Froth.

Little Town Girl—Please, Mr. Farmer, is that pig engaged?"

Farmer—Er, why?

Little Town Girl—She has a ring through her nose.

Hint

"Daddy, should I give Fido some candy?"

"If you want to, yes."

FIRST to have a proving ground

Three years ago General Motors purchased an 1125-acre tract, 40 miles from Detroit and accessible to all its car and truck divisions.

This was transformed into a great Proving Ground, with every kind of road and grade over which an automobile is called upon to travel.

Here the collective experience and brains of the whole General Motors family are brought to bear upon the problems of each member; and here each make of General Motors car must prove itself against the best that American or European genius has developed.

The Proving Ground marks a forward step in the guarantee of motor car satisfaction. It is your final assurance that you are *investing* when you buy a General Motors car.

Broader Outlook Will Reconcile Fundamentalist and Modernist

By REV. JAMES D. BUHRER, Washington.

CONTROVERSY is a sure evidence of progress, and where there is no controversy there is no progress. There may be such a thing as a happy medium somewhere between the radical fundamentalist and the extreme modernist. A person may be a modernist regarding certain viewpoints and a fundamentalist in other beliefs.

A man is a fundamentalist when he regards the value of past experience, but no history is infallible. There is no original copy of the Scriptures; the meanings of words constantly change, and different translations of the Bible are made according to the interpretation of the previous translation by the new translators.

The future religion will consist in living according to the rules of Christ regardless of church denomination or doctrine.

I am a fundamentalist because of my regard for the historic past, of the great progress slowly made. I honor the great leaders. Things are not true because new. I don't want to repeat the follies of the past. I want to transmit the gains of the past. Creeds, ceremonies, rites are fallible evidences of experiences.

I am a modernist, because I hate no one who differs with me. I regard the possibilities of the future. Wisdom will not die with us. The old is not infallible nor true because it survived. The old was once new and had to fight its way. You need not be mentally shabby to be comfortable. I saw many good men mistaken. The future needs a deeper faith and larger vision. I know faith in Christ makes one better and needs no conservatory care. The first modernist declared: "I have yet many things to say."

Social and Political Ills Not to Be Cured by Laws on Statute Books

By UNITED STATES SENATOR ROBINSON of Arkansas.

A common fallacy prevails that for every social and political ill which mortal flesh is heir to, a complete remedy may be found in some new statute. Sixteen thousand written enactments of diversified subject matter exist already in the United States for the regulation of the average man's conduct.

Laws which confer favors are always at the expense of the general public. Such laws give birth to groups, and encourage them to claim special consideration on the ground that it has been extended to others.

The "bloc" system is partly responsible for the almost total lack of public leaders of national influence. The group conflicts at Washington are proof that leadership in a large part is not national in character.

The country needs and must have a reinstatement of political philosophy. Public opinion is divided between Jefferson and Hamilton. The first challenged the right of original capital to control the government. The second championed the cause of the thrifty, the prosperous and successful.

Undoubtedly radical changes have occurred in the social system of the United States, resulting in confused conceptions of private responsibility and of public duty.

Press Called On to Lead in Matters of Common and Vital Interest

By WALTER STRONG, Chicago Newspaper Publisher.

The development of the moral and industrial assets of the community it serves is one big part of a newspaper's business. In the Middle West the press has a common and vital interest in solution of the crime problem, in the working out of waterway projects; in adjustment of freight rates and competition of seaports, with their own rights, to a proper development of inland cities.

It seems to me that if we believe in the powers which we possess, and if we present a united front, we can change this crime situation in a comparatively short time.

Newspaper advertising is the greatest selling force in the world and the day is near when it will be dignified enough to warrant recognition as an exact science.

The civic and industrial problems, whose solution the newspaper shares, are a basis on which we can justify our right to command the respect of our public and thereby prosper in our advertising and circulation departments.

Eternal Human Life One of the Possibilities of the Future

By DR. WILL DURANT, Professor of Philosophy.

Man, in his constant battle with nature, eventually will win out. Science already is lengthening the span of life, and within the next hundred years centenarians will become common. But I cannot say positively that men will live forever; I merely wish to point out that eternal life is not an impossibility.

The age when men will cease to die might have its inconveniences, but there is nothing in science or in philosophy inconsistent with the idea of eventual immortality of the body.

Death is a scheme of nature for making room for the young. But I suppose that if man ever conquers death, he will by that time cease to grow old and retain the vigor of youth.

There is approaching a "golden age" of art, literature and philosophy in America in the near future. This renaissance will compare with the age of Pericles in Greece, Montaigne in France and Shakespeare in England.

Woman Makes Mistake in Not Training Mate for Household Duties

By MRS. MAGGIE BARRY, Federation of Women's Clubs.

One of woman's biggest mistakes is in not training men to be homemakers. Men should contribute to the social as well as the economic life of the home. They think they have to attend only to the money-making. They should feel obligated to make a social, moral and spiritual contribution. There is a serious difference in training.

Men have no sense of the home responsibility. Men should learn nutrition in school. They eat, don't they? They should learn the ethics of family life. I would suggest courses in the principles of clothing, shelter and the arts. I sometimes think the men would share the responsibility if the women would give them a chance.

The KITCHEN CABINET

(©, 1926, Western Newspaper Union.)

Three things to love—courage, gentleness and affection.

Three things to hate—cruelty, arrogance and ingratitude.

Three things to admire—character, intellect and dignity.

HINTS FOR HOUSEKEEPERS

Have a shelf, cupboard or some place protected from dust for empty boxes. Arrange them in order of size, then when a box is needed for some purpose it is quickly found.

If there are those in the home who persist in using the woodwork on which to scratch matches, smear a little vaseline over the spot generally used. After a few attempts to scratch a match on the greasy surface even the most persistent offender will reform.

Oven cloths or holders to handle food in hot dishes should be large enough to be used in both hands; this will save many burns.

A pocket on the inside of an apron will save tearing on door knobs and latches.

Place a small piece of camphor gum in the silver drawer or cupboards where the silver is kept. It will save much cleaning, as the camphor will keep it from tarnishing.

A clothes-pin bag fastened to a clothes hanger is a great convenience. To save stooping when hanging out clothes it can be pushed along on the line.

A nut cracker makes a good wrench for small bottles with screw tops.

A heavy wall paper such as the oatmeal paper may be tinted when faded with any color or special tint desired. Often the paper is faded but perfectly good. With a good wash of some tint it is new and fresh again.

The lower stair of the back stairs put on hinges makes a fine place for rubbers, overshoes and other things which are so often mislaid.

When patching a tear in wall paper, tear—do not cut—the paper to be used as a patch. The uneven edges are not so easily noticed.

A sewing machine needle which has become blunt can be sharpened by stitching a few times through emery paper.

A handful of raisins added to any cooky mixture will improve it; also any fruit salad.

Always keep a few wooden skewers for use about corners. Wrapped in a cloth they will reach spots that the finger cannot, in cleaning.

In cooking rice, add plenty of boiling water and keep it rapidly cooking so that the grains of rice will be distinct.

Apply soap and ammonia to burns from acid immediately to allay pain.

Just Food.

To have our dishes wholesome, nourishing and attractive enough to look good to eat and at the same time have them economical is the thing we are all striving for these days. Common foods cooked uncommonly well and served attractively satisfy the average person. Food that is underseasoned, carelessly served, no matter how rich and rare the combination, loses half its appeal.

Beef Tongue en Casserole.—Wash a fresh beef tongue, cover with boiling water, salted; simmer gently for an hour or two until the meat is tender. Remove the skin and unedible portions and good bits may be saved for hash. Place in a casserole with a cupful each of carrot, celery, a small onion and a sprig of parsley. Thicken the stock with flour and butter cooked together, using a tablespoonful of each, pour over the meat and place in a moderate oven; uncover after the first hour of cooking. For those who like a sour sauce, add chopped pickles or horseradish.

Oriental Hermits.—Take one-half cupful of butter, cream it with one cupful of sugar, add one egg, one cupful of fresh grated coconut, three-fourths of a cupful of rolled oats, (these should be be browned and ground), three-fourths of a cupful of chopped dates, one and one-half cupfuls of flour, one-half teaspoonful of salt, three-fourths teaspoonful of cinnamon, one-half teaspoonful of cloves, one-half teaspoonful of allspice, one-third of a cupful of milk, two teaspoonfuls of baking powder. Drop by teaspoonfuls on baking sheets and bake twelve to fifteen minutes.

Coconut Bread Pudding.—Soak a pint of bread crumbs in a pint of milk, add three tablespoonfuls of coconut and another pint of milk. Sweeten with four tablespoonfuls of sugar, add one-third of a cupful of raisins, a pinch of salt and three beaten eggs. Flavor with lemon rind and pour into a baking dish. Set in hot water and bake slowly until the custard is set.

Jellied Salads.—Any of the prepared gelatins may be used for summer salads Combine with celery, green pepper, apple and fresh fruits and serve with a good salad dressing, letting the mixture stand long enough in the dressing to be well seasoned.

Nellie Maxwell

Honor Thomas Moore as Patriot and Poet

County Wexford Historical society in Ireland has just erected a tablet on the house in which lived the mother of Thomas Moore, the national poet, and the mayor and corporation of the city associated themselves with the tribute. Moore's mother was Anastasia Codd, and her husband, John Moore, came from Kerry.

"Opinions on Moore have differed, and will continue to differ to the end," said Rev. T. Byrne. "Some hailed the poet as a national idol, while others denounced him as a cockney. In the poet's life were incidents which did not appeal to the Irish patriot. He spent most of his time in England, and was the idol of its aristocratic circles. But under his gay and frivolous nature he had the heart of an Irish patriot. He was an intimate friend of Robert Emmet, and wrote for the Republican organ, the Press."

Cuticura Soothes Itching Scalp. On retiring gently rub spots of dandruff and itching with Cuticura Ointment. Next morning shampoo with Cuticura Soap and hot water. Make them your everyday toilet preparations and have a clear skin and soft, white hands.—Advertisement.

The Knee, Plus

Bishop Alma White, founder of the Pillar of Fire church and of Alma college, said on the President Harding:

"Men are responsible for the shocking fashions of the day. Men create these fashions, and fathers actually admire them on their innocent daughters.

"A pretty girl came on deck the other morning in a very smart white silk skirt.

"'Isn't that skirt rather—er—ultra?' her father said.

"She spun round on her heel, and the misguided man laughed and added:

"'Yes, it's knee plus ultra.'"

A simple, old-fashioned medicine, as good today as in 1837, is compounded in Wright's Indian Vegetable Pills. They regulate the stomach, liver and bowels. Adv.

Said It With Flowers

In one big American city is a park with a florist, whose favorite stunt is to welcome conventions in beautiful floral letters of foliage plants grown in boxes and transplanted when needed. When a big Christian Endeavor convention was held there in 1899 the delegates were touched by a beautiful floral welcome. "Here," said one, "is a city with a soul." Had they passed by the next day they would have been horrified to read, "Welcome, Brewers of America."—Capper's Weekly.

Fewer Horses on Farms

Horses and mules, according to the January 1, 1926, report for the Department of Agriculture, number in the United States, on farms, 21,538,000, says Our Dumb Animals. Adding the number estimated not in agricultural work, 2,000,000, we have the total of 23,558,000, a decrease of about 5 per cent since January 1, 1925.

WANT ORCHARD OR ALFALFA RANCH from owner. Send details. Box 772, San Jose, Calif.—Adv.

Compensation

"Does you wife remember your birthday with a present?"

"No, but then I never get the bill for it."

The Punning Patron

"Waiter, is this plank steak?"

"Yes, sir."

"Take it back to the mill, please. It's got too many splinters in it."

Insult

"Does your husband take life easy, now?"

"Sir! He's a doctor."

Bizarre Affair

"That's a funny looking cake, dear."

"Yes, but it will do for the bazar tonight."

Text

"Why do you want a first reader?"

"I want to give a spelldown for my stenographers next week."

The men who have made a noise in the world have not used their mouths alone.

ORGANIZATIONS AND MOTHERS BOTH AGREE

Health of School Girls Important

The Girl Scouts and Camp Fire Girls are two national organizations, working side by side in the cause of healthy, happy, intelligent womanhood; training the minds of eager girls for greater service, training their bodies for the destiny that shall be theirs.

All honor to them! Wise mothers like Mrs. Alice Louthan urge their daughters in their early teens to take Lydia E. Pinkham's Vegetable Compound.

Mrs. Louthan says—"I gave my fifteen-year old girl Lydia E. Pinkham's Vegetable Compound, and it did her a wonderful lot of good. She was out of school for four months. I read the advertisements of the Vegetable Compound, and since she has taken it she has improved and has gone back to school. I recommend the Vegetable Compound to other mothers with girls who are not as strong as they should be."—MRS. ALICE LOUTHAN, Route 2, Charleston, Illinois.

Some girls in the fourth generation are now relying on Lydia E. Pinkham's Vegetable Compound.

Big Building Boom

The recent building boom which has been in progress in all sections of the country has been the cause of razing many an old building to make way for a newer, larger and more beautiful one. Increases in the value of real estate have made it profitable to remove old buildings so that new ones, planned for increased revenue, might be erected.

Cashing In

Teacher—Now I've explained the triangle, what would you do if you had a six-sided figure?

Johnny—I'd get in a side show.—Vancouver Province.

Some men are quite successful in building up a broad forehead; others, a bay window.

Most of those sighing for the good old days wouldn't know which end of a horse to crank.

DALY CITY

NEWS NOTES OF PERSONAL INTEREST

By MARC WORST

Hugh Smith left Tuesday for Rutherford.

Miss Rose Cohn, of Oakland, spent a few days last week visiting Mrs. L. Ross.

Mrs. B. Hanson, of Los Banos avenue, spent a few days last week visiting in Alameda county.

Mr. and Mrs. F. Lane, of 154 Irvington street, are the proud parents of a baby boy, born last week.

Esther Ross is spending her vacation in Galt.

Mrs. H. H. Smith and baby son George left Tuesday for St. Helena.

Mr. Foppiano and Buster Foppiano, of Evergreen avenue, have returned from a two weeks vacation.

The whist given Wednesday in St. Maximus social hall under the auspices of Mrs. R. Fahey was a great success.

Miss Margie O'Connor is leaving Sunday morning with a number of friends for a two weeks vacation in Rio Nido.

H. Rang, of 225 Los Banos avenue, returned home Tuesday night from a visit with his folks at Gualala, Mendocino county.

Mayor H. H. Smith, Evelyn Smith and Winifred O'Rourk left Tuesday for Walters Springs, where they will remain for a time.

Barney Hilton is out of town, enjoying his annual vacation. During his absence Bill Hopmann is taking care of the duties of his office.

Irene Smith is spending a few days with friends in San Francisco.

Miss Joyce Bonner, of London, England, spent the week end at the home of Mrs. L. T. Cook, of 101 Hillcrest Drive.

Sheriff T. C. McGovern, who is a candidate for re-election, was in Daly City the fore part of the week on business.

Harold Purser, of San Jose, a former resident of Daly City, spent the week end visiting old friends in Daly City and vicinity.

John Johnston, of Daly City, who is traveling around the world, writes to his friends quite frequently, telling them of his adventures.

Mrs. M. Murphy, Miss Gertrude Murphy and Walter Murphy visited Mr. and Mrs. J. Reilly, of San Francisco, on Wednesday evening.

Harry L. Parkman, candidate for the Republican nomination for assemblyman, was in Daly City this week in the interest of his candidacy.

Mr. and Mrs. John O'Connor were hosts at house party given to their many friends last Wednesday evening, and it is reported all had a wonderful time.

Miss Greta Kerlin, Charles Vetter and A. R. Bentley were dinner guests of Dr. and Mrs. D. T. Bentley, 290 Los Banos avenue, on Sunday evening.

Mr. and Mrs. Walter White, of 50 Theta avenue, returned last Friday from a pleasant two weeks' vacation spent at Sonoma Grove, in Sonoma county.

Mr. and Mrs. R. E. Fletcher, 216 Templeton avenue, are rejoicing over the arrival of a daughter, born on July 3. Mother and daugter are getting along fine.

Mrs. M. Murphy and granddaughter Patricia Cochrane, Mrs. Downey and Mrs. Hanhay motored to Emerald Lake on Thursday and had a most enjoyable time.

Mr. and Mrs. Fricke and family, Mrs. H. O'Connor, Mrs. M. Graham and Alice Johnson motored to Santa Cruz last Saturday, where they remained until Monday morning.

J. J. Kennedy, superintendent of the Daly City water works, and his crew are busily engaged in erecting the new pump house at the foot of Citrus and Niantic avenues. New machinery is being installed.

Marshal Doyle wishes to again warn everyone to lock all the doors and windiws before leaving their homes. Also to notify him when they are leaving town, so he can watch over their property.

Mr. and Mrs. L. W. Davis, of 410 Miriam street, have just returned from their vacation of two weeks which they spent in Los Angeles and on the beaches. They came home with a good coat of tan and report having had a splendid time.

Strollers have been seen wandering through Daly City. It is believed that they watch for people to leave and then try to enter their homes. If any suspicious characters are seen, notify Marshal Doyle, in order to make Daly City a better and safer place in which to live.

Mr. and Mrs. Kirchoff have improved their beautiful new home on Bellevue avenue, Crocker Tract, by adding on a large enclosed glass sun porch. They have also had their home painted white and put in a lawn, which adds much to the appearance of the neighborhood.

A. J. Bodien has returned from a vacation spent near Reno, and reports having had the time of his life. He reports that fishing was good, in fact, it was so good that he got tired of landing members of the finny tribe and had to come home to get away from the fish.

A birthday party was given in honor of little Barbara Dorothy Davis at her home, 410 Miriam street, on July 10, in celebration of her second birthday. The table was daintily decorated in pink and blue, and adorned with a lovely birthday cake. Little Barbara Dorothy received many presents and happy wishes. Among those present were Dorothy, Beth and Bruce Davis, Agnes and June McArthur, Stephen and Sister Brosen, Lawrence and Frederick Davis, Mrs. J. L. Davis and Mrs. L. W. Davis.

Mrs. L. Ross and Mrs. H. Warshawski and twins spent Wednesday at Neptune Beach.

Mr. and Mrs. Miemis and family, of Evergreen avenue, moved to San Francisco on Thursday.

Katherine McKeown has returned from her vacation and resumed her work as assistant librarian.

Harold Johnson, of Westlake avenue, is spending a few days this week with Mr. Watson in Guerneyville.

Mr. and Mrs. W. Thompson, of 259 Evergreen avenue, left Wednesday for a month's vacation at San Diego.

Business licenses can now be obtained from Marshal Doyle. Be sure to get yours before it is too late. A fine is the penalty for the late comers.

The banquet given by the Eagles' drum corps last Saturday evening was well attended. Every one present reports having had a splendid time.

On Tuesday evening Mrs. L. Whiteside's funeral took place from the mortuary chapel of W. C. Lasswell & Co. Interement was in Mt. Olivet cemetery.

Wednesday night Conci's place on South Park avenue caught fire. A large crowd soon collected, and the fire was extinguished quickly, with little damage resulting.

A whist party will be given Wednesday afternoon, July 21, at 2 o'clock, in St. Maximus social hall, for the benefit of St. Maximus church, under the direction of Miss Margaret Mary Steele. Come and bring your friends.

On Wednesday afternoon, July 21, the regular weekly afternoon whist will be held in St. Maximus church hall, beginning at 2 o'clock. Little Miss Margaret Mary Steel is in charge of this event. which, according to reports, gives promise of being the "wonder" whist of the year. Margaret has made preparations for a record number of tables. Some early and get your seat—Wednesday afternoon next.

Plans are being perfected for the big whist party and dance to be given by El Carmelo Parlor No. 181, N. D. G. W., in the Daly City Auditorium, on Wednesday evening, August 11. Save this date and look for further announcements next week. The proceeds of this affair will be applied to a fund being raised by the Parlor for the purpose of sending their drill team to Sacramento on Admission Day, September 9.

El Carmelo Parlor No. 181, N. D. G. W., will install its officers elect at a regular meeting to be held on Wednesday, August 4, in Masonic Hall. The delegates who recently returned from the Grand Parlor convention held in Sacramento will make their reports. Following the installation, a musical program will be rendered and the members will then enjoy a banquet. D. D. G. P. Rena Mathias and Sylvia Fischer have charge of the affair.

Daly City's new Philanthropy Center, situated in what was formerly the old school room in Ryan's Hall, will open to receive donations Tuesday afternoon, July 20, from 1 to 4 o'clock. Contributions of shoes, clothing, millinery, etc., in sanitary condition, will be gladly received, repaired and sold for trifling sums to help those desiring to take advantage of the high cost of living. Scan your wardrobe, raid the attic, search out those forgotten articles hung in the closet, and bring in your donations.

GRACE PRESBYTERIAN CHURCH

The topic for the Sunday evening sermon next Sabbath will be "Your Appetite." We shall endeavor to show how the man, while not dependent on bread, is following an appetite, and the whole progress of the world today is determined by the desires of the man.

You can spend a very proftable hour with us, and at the same time help to hold up the banner of Jesus Christ in the world. Will you do your part?

Many are away now on their vacations, but in spite of this a splendid audience was present last Sabbath evening and listened to the sermon on "High Cost."

We are endeavoring to be of some help to thoes who live and struggle here in this land and believe that the gospel of Christ is the only real remedy for the ills of mankind.

The Sunday school is keeping up in fine shape during the vacation days and we invite any and all who are not attending to come with us and help us to study the bible.

Charles H. Gatchell, Minister, Phone Delaware 1544.
